Recent Developments in the market

According to an auto alliance company, in 2017 the automotive industry spent around USD 105.0 billion on R&D worldwide to improve the quality and standards of the vehicles. In the manufacturing industry the CMMs offer accurate and precise measurement services. The metrology machines are used for factory product inspection, calibration, and quality which save a lot of time

In May 2017, Hexagon (Sweden) which is a leading Asia-Pacific provider of information technology solutions acquired NEXTSENSE GmbH (Austria), which is a leading innovator in non-contact profile measurement and surface inspection. This acquisition will extend the company capabilities in automotive fit and finish and other industries like rail and steel where company has comparatively small footprint now. Furthermore, it will add value to all the company customers.

In 2014, Mitutoyo America Corporation launched its new product under the brand name MiCAT Planner v1.5 for coordinate measuring machines. The product automates the generation of measurement programs based on CAD models containing geometric dimensioning and tolerancing (GD&T) information as well as dimensional measuring equipment (DME). This product launch extended company's CMM product portfolio.
