Market Segmentation

By Type (Hard Coat Low-E Glass, Soft Coat Low-E Glass), Coating Type (Passive Low-E Coating, Solar Control Low-E Coating), Coating Material (Metallic, Semi-Conductive Coating), Glazing (Single low-E Glazing, Double Low-E Glazing, Triple Low-E Glazing), Technology (Pyrolytic Process (On-Line), Sputtered Process(Off-Line)), End-User (Construction, Transportation), Country (Germany, U.K, France, Netherlands, Russia, Italy, Spain, Belgium, Turkey, Switzerland, Rest of Europe)

Major growing sectors under the market segmentation are as follows:

On the basis of type, soft coat low-e insulated glass dominated the market in 2018. This is majorly due to the high performance of soft coat low-e insulated glass when compared to the hard coat low-e insulated glass. Soft coat low-e insulated glass is anticipated to record the fastest growth during the forecast period of 2019-2026

On the basis of coating type, solar control low-e coating dominated the market in 2018. This is majorly due to the high demand for the soft coat low-e insulated glass, in the region, as soft coat low-e insulated glass is produced by solar control low-e coating. Solar control low-e coating is anticipated to record the fastest growth during the forecast period of 2019-2026.

On the basis of coating material, metallic segment dominated the market and is expected to record the fastest growth during the forecast period of 2019-2026, also. This dominance is majorly attributed to its economical production and superior performance when compared to other coating materials.

On the basis of glazing, double low-e glazing dominated the market in 2018, and is expected to record the fastest growth during the forecast period of 2019-2026. This is majorly due to the low price and durability of the double low-e glazing glass, as compared to the single and triple low-e glazing glass

On the basis of technology, sputtered process also known as off-line process dominated the market in 2018 and is expected to record the fastest growth during the forecast period of 2019-2026, as this process, produces more durable grade of products with high performance.

On the basis of end-user, construction segment dominated the market in 2018 and is expected to record the fastest growth during the forecast period of 2019-2026 This is majorly due to the rising awareness regarding its beneficial properties such as reduced heating and cooling expense in residential and commercial spaces
