Major growing sectors under the Market Segmentation are as follows:

In products, internal fixator devices segment is dominating the market as well as growing with highest CAGR in the forecast period as majorly screws, nails, wires are majorly used in trauma fixation procedure rather than external fixation devices. Also patient face acceptance difficulties in external fixation devices.

In surgical site, based on procedure numbers, number of lower extremities procedures including Knee, Foot and Ankle, Hip & Pelvic, Lower Leg, Thigh is more than the procedure done in upper extremities area. Hence, lower extremities are dominating as well as growing with highest CAGR in the market.

In end user, majority of the trauma fixation procedure including replacement and reconstruction are held in hospitals due to availability of doctors and advanced
