MARKET SEGMENTATION

By Filter Media (Woven {Mono Filament, Multi Filament}, Non-Woven {Needlefelts, Meltblown, Wetlaid, Spunbond, Mesh}), Fabric (Polymer, Aramid, Metal, Cotton), End User (Food and Beverages, Municipal, Chemical, Mining, Biopharmaceutical, Others), Geography (North America, Europe, Asia-Pacific, Europe, South America, Middle East & Africa).

Major growing sectors under the market segmentation are as follows:

In filter media, the woven segment consists of monofilament and multi filament filter media which is mostly applicable in as food & beverages application due to its minute extraction and stabilization whereas, non-woven will have a higher growth rate in future due to its higher efficiency, incurs less maintenance costs as well as comes in a low cost compared to other filter media.

In fabric, the polymer segment is mostly preferred by end user industry such as gas and petrochemicals, pharmaceutical, beverage and others due to its better pores quality, viscosity and standalone in high temperature. It is comprise of low weight and is least expensive than other types of fabrics.

In end user, the food and beverages industry is rapidly increasing in liquid

filtration market for the extraction and stabilization of fats from food items. It is expected to augment with maximum market share due to the growing need for the advanced microfiltration in food and beverages so as to produce high quality and contaminated products.
