MARKET SEGMENTATION

By Process (Knitted, Non-Woven, Woven and Others), Material (Regenerated Fiber, Mineral, Synthetic Polymer, Natural Fiber, Metal, High Performance Fiber and Others), Application (Geotech, Oekotech, Mobiltech, Indutech, Packtech, Sportech, Protech, Buildtech, Agrotech, Hometech, Clothtech and Meditech), Technology (Spinning, Weaving, Knitting, Finishing, Nanotechnology and others), Geography (North America, Europe, Asia Pacific, South America, Middle East and Africa) Industry Trends and Forecast to 2026.

Major growing sectors under the market segmentation are as follows:

Based on process, the woven segment is growing at the highest CAGR, during the forecast period of 2019-2026. This is majorly due to the wide applicability of the woven fabrics in technical textiles. As, woven fabrics are more durable and most widely used in clothing and garments as well as for decoration and covering purposes. In addition, woven fabric also used as sportswear, medical applications, textiles for electronics and airbag construction in automotive engineering.

Based on material, the synthetic polymer segment is growing at the highest CAGR, during the forecast period of 2019-2026. This is due to the growing

popularity of various synthetic polymers such as polypropylene, polyester, polyacrylonitrile, polyether sulfone among others.

Based on application, the geotech segment is growing at the highest CAGR, during the forecast period of 2019-2026. This is majorly due to the growing demand of geotech from construction sector. It has been majorly used in the various construction applications such as road works, river canals and coastal works, railway works, drainage, sports field construction, among others.

Based on technology, the knitting segment is growing at the highest CAGR, during the forecast period of 2019-2026. As knitting is more cost effective, when compared to the spinning, weaving, finishing, and nanotechnology
