## Abstracts

Global trauma fixation market is projected to register a healthy CAGR of 6.9% in the forecast period 2018 to 2025. The new market report contains data for historic years 2017, the base year of calculation is 2018 and the forecast period is 2018 to 2025.

### Market Segmentation

By Products (Internal Fixation Devices, External Fixation Devices, Other Trauma Products), Surgical Site (Lower Extremities, Upper Extremities), End User (Hospitals, Trauma Centers, Ambulatory Surgery Centers), Distribution Channel ( Direct Tenders, Retails), Geography (North America, Europe, Asia Pacific, South America, Middle East & Africa)

Major growing sectors under the Market Segmentation are as follows:

In products, internal fixator devices segment is dominating the market as well as growing with highest CAGR in the forecast period as majorly screws, nails, wires are majorly used in trauma fixation procedure rather than external fixation devices. Also, patient faces acceptance difficulties in external fixation devices.

In surgical site, based on procedure numbers, number of lower extremities procedures including Knee, Foot and Ankle, Hip & Pelvic, Lower Leg, Thigh is more than the procedure done in upper extremities area. Hence, lower extremities are dominating as well as growing with highest CAGR in the market.

In end user, majority of the trauma fixation procedure including replacement and reconstruction are held in hospitals due to availability of doctors and advanced

devices than other end use segment. Thus, hospital segment is dominating the trauma fixation market.

In distribution channel, majority of the hospitals, trauma centers buy fixation products directly from manufacture in order to minimize the cost and to increase the channel goodwill. Hence, direct tender segment is dominating the market as well as growing with highest CAGR in the forecast period.
