Major growing sectors under the market segmentation are as follows:

In type, flexible segment is dominating the market. Traditionally, rigid laryngoscopy has been used to evaluate the larynx. However recently, flexible laryngoscopy has been used to visualize the airway. As, flexible laryngoscopy is a thin, flexible viewing tube which can easily pass through the nose and guided to the vocal cords, or larynx and provide easy visualization of larynx, thus, it is majorly preferred.

In visualization system, video laryngoscopes segment is dominating the market. The video laryngoscopy is a form of indirect laryngoscopy in which larynx is not directly visible to the doctor. Instead, visualization of the larynx is performed with a fiber optic or digital laryngoscope inserted transnasally or transorally.

In accessories, handles segment is dominating the market. Growing awareness amongst the population towards the diseases and concern with the changing

lifestyle and proper visit and medication from doctors are the major reason of the growth of the market.

In application, diagnostic segment is the dominating the market as majorly the laryngoscopes are used in diagnosis of various diseases within less time and can be treated while in surgery it is used as surgical guided. Hence diagnostics segment is dominating the Middle East & Africa laryngoscopes market.

In end user, hospitals segment is dominating in the market. The hospital segment in the end user comprises the highest share and dominating the market with highest CAGR, the growing awareness amongst the population towards the diseases and concern with the changing lifestyle and proper visit and medication from doctors are the major reason of the growth of the market.
