Market Segmentation

By Type (Sensor type and Camera type), Vehicle Type (Passenger car, LVC and HCV), Application (Sensor and Camera)

Major growing sectors under the Market Segmentation are as follows:

In type, there are two notable segments, sensor type and camera type. Whereas Sensor type accounted for the maximum share in the year 2018 owing to high adoption of different types of sensors in the vehicle. It has been observed that companies are coming up with advanced temperature sensor because of its requirement in automotive HVAC (Heating, ventilation, and air conditioning) system. In addition, adoption of camera in the automobile is witnessing a considerable growth. Benefits of camera in the vehicle it has been observed that companies are coming up with advanced digital cameras because its application such as park assist system, lane departure warning system, adaptive cruise control system, blind spot detection and others. Because of above factors this type segment is growing at the 9.0% CAGR.

In vehicle type, there are three sub segments, named as passenger car, LCV,

and HCV. Passenger car segment is driving the vehicle type market because of the most of automotive sensors and cameras have been used in passenger car for remote keyless entry, automatic rain wipers, automatic headlamps, washer fluid level, headlamp levelling and others. Hence passenger car segment growing with highest 9.5% CAGR rate

In application, sensor segment has highest market share USD 46,141.90 million. It has been observed that sensor segment is driving the vehicle type market due to its high requirement in safety features of automotive such as traction control, electronic stability control, forward-collision warning, tire-pressure monitors and others
