The North America infusion pump system, accessories and software market is segmented on the basis of type, application, end-user, distribution channel and

geography.

The North America infusion pump system, accessories and software market is segmented into three types, such as infusion pump system, infusion pump accessories and infusion pump management software.

Infusion pump systems are further segmented into volumetric infusion pump systems, syringe infusion pump systems, ambulatory infusion pump systems, enteral infusion pump systems, insulin infusion pump systems, implantable infusion pump systems, anesthesia infusion pump systems, patient-controlled analgesic and chemotherapy infusion pump systems.

Also, infusion pump accessories are further segmented into infusion administration sets, IV sets, and needle connectors. Infusion pump management software is further divided into asset management modules, electronic medical records (EMR) modules, respiratory monitoring modules and others.

On the basis of application, the North America infusion pump system, accessories and software market is segmented into general infusion, pain and anesthesia management, insulin infusion, enteral infusion, chemotherapy and others.

On the basis of end users, the North America infusion pump system, accessories and software market is segmented into hospitals, ambulatory, home healthcare, clinics and others.

On the basis of distribution channel, the North America infusion pump system, accessories and software market is segmented into public and private.

Based on geography, the market is segmented into three geographical regions, such as, U.S., Canada and Mexico.

Infusion pump management software market is growing with the highest CAGR.

Infusion pump accessories are driving the market with the highest market share. However, infusion pump management software is growing with the highest CAGR.

Volumetric infusion pump is dominating the product type of North America infusion pump system, accessories and software market.
