Abstracts

North America Ventilator market is expected to reach a CAGR of 7.4% in the forecast period of 2018 to 2025. The new market report contains data for the historic year 2016, the base year of calculation is 2017 and the forecast period is 2018 to 2025.

Market Segmentation

By Product type (Intensive Care, Portable, Neonatal), Modality (Non-Invasive Ventilation, Invasive Ventilation), Type (Adult, Pediatric, Neonatal), Mode (Combined-Mode, Volume-Mode, Pressure-Mode, Other), End User (Hospitals & Clinics, Home Care, Ambulatory Centers, Speciality Clinics, Rehabilitation centers, Long Term Care Centres, Homecare Settings), Country (U.S., Canada and Mexico)

Major growing sectors under the market segmentation are as follows:

In product type, the intensive care ventilators are highly used because these ventilators can be used for adults and pediatric. These can be used in unpredictable or unstable health condition. Because of this intensive care ventilators are growing at the highest CAGR.

In type, adult ventilators are growing at the highest CAGR because the number of adult patients requiring the ventilators are comparatively more than the neonates and pediatric.

In modality, non-Invasive ventilation is growing with highest CAGR rate because of complications associated with mechanical ventilation.

In Mode, Combined-Mode Ventilation is growing with highest CAGR because in combined ventilators pressure and volume of air can be controlled.

In End user, hospital segment is growing at the highest CAGR because of growing population of long-term ICU patients requiring prolonged ventilation making higher demand of ventilators in the hospitals.
