Abstracts

The Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) was valued at in and is anticipated to reach by , at a CAGR of xx% from 2026 to 2032.

The report delivers in-depth insights into key market dynamics, including regional growth trends, market segmentation, CAGR projections, and the revenue performance of leading industry players. It also highlights major growth drivers shaping the market landscape. Designed to provide a clear and comprehensive perspective, the report offers a detailed view of the current market size in terms of both value and volume, along with emerging opportunities and the overall development outlook of the Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031).

This report delivers a comprehensive overview of the Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K MT) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast

and outlook (2024-2031) Scope:

Major Highlights

This report delivers a comprehensive overview of the Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Alzheimer's Disease (AD) – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K Sqm) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

This report will assist keyword manufacturers, new entrants, and companies across the industry value chain with information on revenues, production, and average prices for the overall market and its sub-segments, by company, by Type, by Application, and by region.

Regional Analysis:

North America (U.S., Canada, Mexico)

Europe (U.K., Italy, Germany, Russia, France, Spain, The Netherlands and Rest of Europe)

Asia-Pacific (India, Japan, China, South Korea, Australia, Indonesia Rest of Asia Pacific)

South America (Colombia, Brazil, Argentina, Rest of South America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of Middle East & Africa)

Partner Identification

Increase Your Customer Base by 3X using our Partner Identification tool

Uncover strategic collaboration opportunities with DataM vetted partners aligned to your ecosystem.

Identify high potential M&A targets based on synergies, market positioning and growth trajectory.

Prioritize partners by strategic fit rather than general capability.

Why Choose DataM?

Data-Driven Insights: Dive into detailed analyses with granular insights such as pricing, market shares and value chain evaluations, enriched by interviews with industry leaders and disruptors.

Post-Purchase Support and Expert Analyst Consultations: As a valued client, gain direct access to our expert analysts for personalized advice and strategic guidance, tailored to your specific needs and challenges.

White Papers and Case Studies: Benefit quarterly from our in-depth studies related to your purchased titles, tailored to refine your operational and marketing strategies for maximum impact.

Annual Updates on Purchased Reports: As an existing customer, enjoy the privilege of annual updates to your reports, ensuring you stay abreast of the latest market insights and technological advancements. Terms and conditions apply.

Specialized Focus on Emerging Markets: DataM differentiates itself by delivering in-depth, specialized insights specifically for emerging markets, rather than offering generalized geographic overviews. This approach equips our clients with a nuanced understanding and actionable intelligence that are essential for navigating and succeeding in high-growth regions.

Value of DataM Reports: Our reports offer specialized insights tailored to the latest trends and specific business inquiries. This personalized approach provides a deeper, strategic perspective, ensuring you receive the precise information necessary to make informed decisions. These insights complement

and go beyond what is typically available in generic databases.

ALZHEIMER'S DISEASE

- Alzheimer's disease is an irreversible, progressive, neurodegenerative, and fatal disease that slowly affect memory, cognition, and function. Alzheimer's disease is the most common cause of dementia among older people. Dementia is nothing but the loss of cognitive functioning of thinking, remembering, and reasoning and behavioral abilities, which will interfere with a person's daily life and activities.
- Dementia ranges from mild to the most severe stage of severity, where the person depends entirely on others for primary activities of life. Age and genetic inheritance are the key risk factors for developing Alzheimer's disease.
- Currently, there is no therapeutic cure available for Alzheimer's disease; however, available drugs can lower symptoms or severity of the disease.
- Although many companies have invested in the development of a new drug for Alzheimer's disease, a very few molecules have shown a steady improvement in the condition of the patient, and many of those investigational candidates failed to provide a significant increase in patients condition during phase three clinical trials.
- Symptomatic treatments include the drugs that are aimed at cognitive enhancement or control of neuropsychiatric symptoms and works typically through neurotransmitter mechanisms; disease-modifying therapies or treatments (DMTs) that prevent, delay, or slow progression and target the underlying pathophysiologic amyloid-related mechanisms. Stem cell therapies were also included in the category.
- Some products are available in the market to control ads like Color Cards Activity, Color-Coded Therapy, which are designed to stimulate the mind and sense. Alzheimer's games and puzzles and eating dishes are available in the market for brain activity.
- The U.S. Food and Drug Administration (FDA) has approved two types of medications like cholinesterase inhibitors (Aricept, Razadyne, Exelon) and memantine (Namenda) for treating the cognitive symptoms of Alzheimer's disease more than a decade ago.
- The AD treatment pipeline is robust consisting of 112 molecules, among which 26 of 35 trials are in phase III, 63 agents of 75 tests are in phase II, and 23 fragments of 25 trials are in phase I. The mechanisms of actions of the agents review in the pipeline include 63% of disease-modifying therapies, 22% of symptomatic cognitive enhancers, and 12% of symptomatic agents, which addresses neuropsychiatric and behavioral changes.
- Some of the agents currently in phase III of Alzheimer's disease drug development include Aducanumab by Biogen, AVP-786, AZD3293 (LY3314814) BY AstraZeneca and Eli Lilly, AXS-05, CAD106 & CNP520, and Crenezumab.
- Some of the agents currently in phase II of Alzheimer's disease drug development

include ABBV-8E12 by AbbVie, BAN2401 by Eisai, Candesartan, Deferiprone, Formoterol, IONIS MAPTRx, and Nilotinib. Some of the agents currently in phase I of Alzheimer's disease drug development include AGN-242071 by Allergan, JNJ-63733657 by Janssen, Oxaloacetate (OAA), Telmisartan, and Vorinostat.

- The global Alzheimer's market is mainly driven by the growing occurrence of diseases specifically in developed countries of the Western region.
- Furthermore, the prevalence of some neurodegenerative diseases like dementia, growing occurrence of diseases, firm government encouragement for Alzheimer's drug development, and increasing alertness about the treatment of Alzheimer's disease is resulting into increased demand for Alzheimer's drugs market.
- However, the high cost of the advance drugs may create restraints in underdeveloped countries. Also, awareness about Alzheimer's disease in the developing regions remains restricted that resulted in obstructive research infrastructure and unbalanced healthcare systems.
