Abstracts

The Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) was valued at in and is anticipated to reach by , at a CAGR of xx% from 2026 to 2032.

The report delivers in-depth insights into key market dynamics, including regional growth trends, market segmentation, CAGR projections, and the revenue performance of leading industry players. It also highlights major growth drivers shaping the market landscape. Designed to provide a clear and comprehensive perspective, the report offers a detailed view of the current market size in terms of both value and volume, along with emerging opportunities and the overall development outlook of the Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031).

This report delivers a comprehensive overview of the Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K MT) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) Scope:

Major Highlights

This report delivers a comprehensive overview of the Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Atopic Dermatitis – Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K Sqm) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

This report will assist keyword manufacturers, new entrants, and companies across the industry value chain with information on revenues, production, and average prices for the overall market and its sub-segments, by company, by Type, by Application, and by region.

Regional Analysis:

North America (U.S., Canada, Mexico)

Europe (U.K., Italy, Germany, Russia, France, Spain, The Netherlands and Rest of Europe)

Asia-Pacific (India, Japan, China, South Korea, Australia, Indonesia Rest of Asia Pacific)

South America (Colombia, Brazil, Argentina, Rest of South America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of Middle East & Africa)

Partner Identification

Increase Your Customer Base by 3X using our Partner Identification tool

Uncover strategic collaboration opportunities with DataM vetted partners aligned to your ecosystem.

Identify high potential M&A targets based on synergies, market positioning and growth trajectory.

Prioritize partners by strategic fit rather than general capability.

Why Choose DataM?

Data-Driven Insights: Dive into detailed analyses with granular insights such as pricing, market shares and value chain evaluations, enriched by interviews with industry leaders and disruptors.

Post-Purchase Support and Expert Analyst Consultations: As a valued client, gain direct access to our expert analysts for personalized advice and strategic guidance, tailored to your specific needs and challenges.

White Papers and Case Studies: Benefit quarterly from our in-depth studies related to your purchased titles, tailored to refine your operational and marketing strategies for maximum impact.

Annual Updates on Purchased Reports: As an existing customer, enjoy the privilege of annual updates to your reports, ensuring you stay abreast of the latest market insights and technological advancements. Terms and conditions apply.

Specialized Focus on Emerging Markets: DataM differentiates itself by delivering in-depth, specialized insights specifically for emerging markets, rather than offering generalized geographic overviews. This approach equips our clients with a nuanced understanding and actionable intelligence that are essential for navigating and succeeding in high-growth regions.

Value of DataM Reports: Our reports offer specialized insights tailored to the latest trends and specific business inquiries. This personalized approach provides a deeper, strategic perspective, ensuring you receive the precise information necessary to make informed decisions. These insights complement and go beyond what is typically available in generic databases.

MARKET OUTLOOK

- Atopic dermatitis is described as the most common type of eczema. The patients suffering from this disease are known to have super sensitive skin and also a decreased threshold for irritation. Also, it misguides the immune system that will lead to chronic diseases.
- The occurrence of atopic dermatitis is common worldwide, especially in infants and children. Atopic dermatitis includes hay fever, food allergies, anaphylaxis, atopic dermatitis, and allergic asthma. Atopic dermatitis has various patterns depending on the age of patients and can occur in the inside of the elbows, knees, sides of the neck, ankles, wrists, and hands and has the tendency to develop papules, which leads to rashes.
- It is characterized by a low quantity of filaggrin protein. Additionally, the skin is very susceptible to infections, such as herpes simplex, staphylococcal and streptococcal bacterial skin infections, warts, and molluscum contagiosum.
- Allergy plays a significant role in patients with atopic dermatitis. The disease mostly occurs when the patient is near to the things that will cause allergic reactions.
- The food allergy is mostly highly arguable in atopic dermatitis from decades, including some common foods like milk, soy, and egg. The major cause for atopic dermatitis of the human body also includes the malfunction in their immune system.
- In addition, some of the factors include skin irritants due to the usage of certain soaps, perfumes, detergents, etc. are. The type of drugs used is a hormone, Erythropoietin, Interferon, Monoclonal antibodies, Calcitonin, and others. It is known to cause blood disorders, Cancer, infectious diseases, chronic diseases, and others.
- The atopic dermatitis market growth is mainly attributed to the increasing occurrence of atopic disorders, and also decreased the quantity of protein filaggrin in the skin. Atopic dermatitis also called as atopic eczema is commonly related to a 'skin condition' as a misconception, where it is misunderstood to be self-dealt. However, it impacts the patient life both physically and emotionally.
- The market mostly consists of topical treatment, steroids, and calcineurin inhibitors. Strong pipeline molecules such as ABT-494, apremilast, LY-3009104, GSK-2894512, REGN-668, GBR-830, MEDI-9929, nemolizumab, OPA-15406, PF-04965842, secukinumab, and tralokinumab are expected to show dermatitis treatment market growth over the forecast period.
- An equal number of studies is found to be phase 2 and phase 3 clinical trial developments of drugs for treating atopic dermatitis including Baricitinib by Eli Lilly and Incyte Corporation, Upadacitinib by AbbVie. Novartis entered into a unique license agreement with biotech companies Galapagos NV, Munich, Mechelen, and MorphoSys

AG, for the global development and providing marketing rights to MOR106, a novel antibody. Vasomune Therapeutics and AnGes, Inc collaborated to advance novel platform with vascular dysfunction.

- Other factors driving this market are rich pipeline portfolio with products in advanced stages of clinical development, increasing government funds to support research for this disease, and rising campaigns to raise eczema awareness. The allergic reactions particularly due to food are one major factor increasing the burden of atopic dermatitis and drive this market.
- The higher disease severity was related to greater clinical and economic weight, which acts as one of the major hindrances for the atopic dermatitis market growth. Further, advancing technology in using medical devices is going to add fuel to the market growth. Another significant restraint involved in the scope of the study is serious side effects associated with certain therapeutic drugs.
