Abstracts

The Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) was valued at in and is anticipated to reach by , at a CAGR of xx% from 2026 to 2032.

The report delivers in-depth insights into key market dynamics, including regional growth trends, market segmentation, CAGR projections, and the revenue performance of leading industry players. It also highlights major growth drivers shaping the market landscape. Designed to provide a clear and comprehensive perspective, the report offers a detailed view of the current market size in terms of both value and volume, along with emerging opportunities and the overall development outlook of the Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031).

This report delivers a comprehensive overview of the Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K MT) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and

outlook (2024-2031) Scope:

Major Highlights

This report delivers a comprehensive overview of the Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Cancer Immunotherapies – Pipeline Insights – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K Sqm) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

This report will assist keyword manufacturers, new entrants, and companies across the industry value chain with information on revenues, production, and average prices for the overall market and its sub-segments, by company, by Type, by Application, and by region.

Regional Analysis:

North America (U.S., Canada, Mexico)

Europe (U.K., Italy, Germany, Russia, France, Spain, The Netherlands and Rest of Europe)

Asia-Pacific (India, Japan, China, South Korea, Australia, Indonesia Rest of Asia Pacific)

South America (Colombia, Brazil, Argentina, Rest of South America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of Middle East & Africa)

Partner Identification

Increase Your Customer Base by 3X using our Partner Identification tool

Uncover strategic collaboration opportunities with DataM vetted partners aligned to your ecosystem.

Identify high potential M&A targets based on synergies, market positioning and growth trajectory.

Prioritize partners by strategic fit rather than general capability.

Why Choose DataM?

Data-Driven Insights: Dive into detailed analyses with granular insights such as pricing, market shares and value chain evaluations, enriched by interviews with industry leaders and disruptors.

Post-Purchase Support and Expert Analyst Consultations: As a valued client, gain direct access to our expert analysts for personalized advice and strategic guidance, tailored to your specific needs and challenges.

White Papers and Case Studies: Benefit quarterly from our in-depth studies related to your purchased titles, tailored to refine your operational and marketing strategies for maximum impact.

Annual Updates on Purchased Reports: As an existing customer, enjoy the privilege of annual updates to your reports, ensuring you stay abreast of the latest market insights and technological advancements. Terms and conditions apply.

Specialized Focus on Emerging Markets: DataM differentiates itself by delivering in-depth, specialized insights specifically for emerging markets, rather than offering generalized geographic overviews. This approach equips our clients with a nuanced understanding and actionable intelligence that are essential for navigating and succeeding in high-growth regions.

Value of DataM Reports: Our reports offer specialized insights tailored to the latest trends and specific business inquiries. This personalized approach provides a deeper, strategic perspective, ensuring you receive the precise information necessary to make informed decisions. These insights complement

and go beyond what is typically available in generic databases.

CANCER IMMUNOTHERAPIES

- The “Cancer Immunotherapies – Pipeline Insights 2018?” report covers an in-depth analysis of Cancer Immunotherapies drug molecules currently undergoing clinical studies.
- It provides a deep understanding of potential Cancer Immunotherapies drug molecules across all drug development phases.
- The report assesses the pipeline Cancer Immunotherapies molecules by stage of development (discovery, pre-clinical, IND, Phase I, Phase II, Phase III and pre-registration), by recruitment status (recruiting, active not recruiting, completed, NA, and unknown), therapy type (monotherapy, combination products) molecule type (small molecules, biologics) and route of administration (oral, IV, and others).
- The report provides a snapshot of discontinued and dormant drugs too. In addition, the report includes key insights on other development activities, including (but not limited to) – licensing, collaborations, acquisitions, funding, patent, and regulatory designations.
- The report covers company profiles key players in developing Cancer Immunotherapies drug molecules. The company profile includes key info on overview, financial highlights, product portfolio, business strategies, and key recent developments.

MARKET OUTLOOK

- Cancer is a group of diseases that are characterized by abnormal cell growth. It involves a multi-step process because a single mutation is almost certainly not sufficient to become a malignant cell.
- Some cellular processes are deregulated that will allow the cells to proliferate uncontrolably while avoiding apoptosis. Initially, key cell growth, pro-apoptotic and proliferative signaling pathways are deregulated in most of the cancers.
- These signaling pathways lead to cell survival, continued proliferation and the avoidance of programmed cell death.
- The diseases are caused by the accumulation of genetic mutations that provide selective advantages allowing cells to evolve and accumulate virtually in all sites and tissues of the human body.
- Immunotherapy of cancer is a type of cancer treatment that stimulates the human bodies natural immune system to fight against the malignant cells. This therapy is introduced to the cancer patients to stop the spread of cancer, to decline the growth of cancer cells and to boosts the natural immunity for destroying the cancer cells.
- The introduction of advanced treatment options in cancer immunotherapy that are more effective and efficient are resulting in rising R&D. The shift of therapies from traditional chemotherapies to immunotherapies is prompting the overall market.

- However, the demand in the market is augmented by more significant factors. For example, the launch of more effective bioinformatics tools and rise in the requirement of cancer monoclonal antibodies that offers improved drug development options will help with more demand for cancer immunotherapy. Further, the surge in providing immunotherapy therapeutics compared to conventional ones and a high number of cancer incidences could increase market growth in the coming years.

WHAT'S TRENDING IN THIS MARKET?

- Cancer immunotherapies are targeted for treating several types of cancer including Lung cancer, Breast cancer, Colorectal cancer, Melanoma cancer, Prostate cancer, Head & Neck cancer, melanoma, NSCLC, and ovarian cancer. Cancer immunotherapies use to treat these cancers by using the products including antibody drug conjugates (ADCs), cytokines, bispecific monoclonal antibodies, interferons, PD-1/PD-L1 inhibitors, chimeric antigen receptor (CAR) T-Cell Therapy, dendritic cells, IDO inhibitors and adopted cell therapy (ACT).
- The market size for cancer immunotherapies is known to grow at an increasing rate over the forecast period. Overall, there are 2,037 products found to be in active development in the pipeline of cancer immunotherapy.
- This makes a significant portion of the entire oncology pipeline and adds a strong interest in product development in this class of therapy.
- This is because of the growing clinical rationale besides developing such therapies, and the interest of drug developers to invest in developing novel therapeutics, which will offer appropriate product differentiation from competitors of the market.
- Anyway, the cancer immunotherapy pipeline is found to be clearly strong; a notable proportion is made up by early-stage products, those from the discovery stage to phase I.
- This indicates the difficulty that is associated with progressing cancer immunotherapies from the preclinical laboratory to clinical application studies in humans. Immunotherapies found to have fewer side effects and thus hold high efficacy to treat various cancers. Cancer immunotherapies have made nearly 50% of the cancer drugs in the market.
- Development of targeted and combination therapies was trending now in the market for treating cancers. As the patent expiry of top-selling drugs in the market is taking place, thus it places a challenge for the development of novel drug therapeutics in cancer patients.
- The interest in cancer immunotherapy development has been driven by an increase in demand for cancer monoclonal antibodies and by the increased understanding of the immune system that acts as a hallmark of cancer pathophysiology, importantly immune evasion of developing cancer cells.

SCOPE OF THE REPORT

- Provides comprehensive understanding of active Cancer Immunotherapies pipeline drug candidates
- Includes all-inclusive pipeline product coverage with segregation by various stages of the pipeline from discovery to late-stage.
- Offers pipeline assessment by monotherapy, combination therapy products, and route of administration
- Provides a comparative analysis of key marketed products and pipeline drug candidates
- Includes detailed pipeline drug profiles covering – product description, chemical information, molecule type, mechanism of action, route of administration, product safety and efficacy, developers and collaborators
- Provides key info on players involved in clinical R&D of Cancer Immunotherapies drug candidates.
- Provides in-depth coverage of key news related to Cancer Immunotherapies drug molecules, including major mergers and acquisitions and product development updates such as clinical trial progression updates and regulatory updates.

REASONS FOR PURCHASING THIS REPORT?

- To obtain an understanding of the current Cancer Immunotherapies pipeline landscape.
- To determine drug development dynamics and leverage it for innovation of novel or repositioned drugs.
- To valuably optimize R&D activities in-line with robust therapeutic drug markets.
- To devise strategic initiatives by identifying prospective partners with progressing projects.

Cancer Immunotherapies – Pipeline Insight, 2018
