Abstracts

The Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) was valued at in and is anticipated to reach by , at a CAGR of xx% from 2026 to 2032.

The report delivers in-depth insights into key market dynamics, including regional growth trends, market segmentation, CAGR projections, and the revenue performance of leading industry players. It also highlights major growth drivers shaping the market landscape. Designed to provide a clear and comprehensive perspective, the report offers a detailed view of the current market size in terms of both value and volume, along with emerging opportunities and the overall development outlook of the Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031).

This report delivers a comprehensive overview of the Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K MT) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and

outlook (2024-2031) Scope:

Major Highlights

This report delivers a comprehensive overview of the Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031), with both quantitative and qualitative analyses, to help readers develop growth strategies, assess the competitive landscape, evaluate their position in the current market, and make informed business decisions regarding Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031). The Pressure Ulcer Therapeutics Pipeline Insight – 2018 Size, Share, Industry, Forecast and outlook (2024-2031) size, estimates, and forecasts are provided in terms of output/shipments (K Sqm) and revenue (US\$ millions), with 2025 as the base year and historical and forecast data for –.

This report will assist keyword manufacturers, new entrants, and companies across the industry value chain with information on revenues, production, and average prices for the overall market and its sub-segments, by company, by Type, by Application, and by region.

Regional Analysis:

North America (U.S., Canada, Mexico)

Europe (U.K., Italy, Germany, Russia, France, Spain, The Netherlands and Rest of Europe)

Asia-Pacific (India, Japan, China, South Korea, Australia, Indonesia Rest of Asia Pacific)

South America (Colombia, Brazil, Argentina, Rest of South America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of Middle East & Africa)

Partner Identification

Increase Your Customer Base by 3X using our Partner Identification tool

Uncover strategic collaboration opportunities with DataM vetted partners aligned to your ecosystem.

Identify high potential M&A targets based on synergies, market positioning and growth trajectory.

Prioritize partners by strategic fit rather than general capability.

Why Choose DataM?

Data-Driven Insights: Dive into detailed analyses with granular insights such as pricing, market shares and value chain evaluations, enriched by interviews with industry leaders and disruptors.

Post-Purchase Support and Expert Analyst Consultations: As a valued client, gain direct access to our expert analysts for personalized advice and strategic guidance, tailored to your specific needs and challenges.

White Papers and Case Studies: Benefit quarterly from our in-depth studies related to your purchased titles, tailored to refine your operational and marketing strategies for maximum impact.

Annual Updates on Purchased Reports: As an existing customer, enjoy the privilege of annual updates to your reports, ensuring you stay abreast of the latest market insights and technological advancements. Terms and conditions apply.

Specialized Focus on Emerging Markets: DataM differentiates itself by delivering in-depth, specialized insights specifically for emerging markets, rather than offering generalized geographic overviews. This approach equips our clients with a nuanced understanding and actionable intelligence that are essential for navigating and succeeding in high-growth regions.

Value of DataM Reports: Our reports offer specialized insights tailored to the latest trends and specific business inquiries. This personalized approach provides a deeper, strategic perspective, ensuring you receive the precise information necessary to make informed decisions. These insights complement

and go beyond what is typically available in generic databases.

PRESSURE ULCER THERAPEUTICS PIPELINE ANALYSIS

- Pressure ulcers are considered as an injury that is caused by breaking down the skin and underlying tissue. The body parts that are at higher risk of occurring pressure ulcers are those that are not covered by a large amount of body fat and are in direct contact with a supporting surface (bed or a wheelchair). Causes include continuous pressure, friction, and shear.
- Treatment includes antibiotics and nutrition. This causes cessation of nutrition and oxygen supply to the tissues, tissue necrosis, and tissue ischemia.
- The increased pressure will cause microcirculatory occlusion, and further leads to tissue death and ulceration. Pressure ulcers, also known to be bedsores or decubitus ulcers, which are often seen in geriatric people and hospital patients. It commonly occurs in acute respiratory patients and in the patients who spend in the bed for a longer period of time.
- As interface pressure is known to be the key risk factor in the pressure ulcers development, continuous visual feedback of continuous pressure imaging (CPI) between the body and support surface could inform healthcare providers on repositioning strategies and play an important role in an overall strategy for the management and prevention of pressure ulcers.
- High unmet needs found in the global pressure ulcers treatment market is going to create more opportunities for existing players and also for the new entrants.
- Recent studies that are conducted on pressure ulcers include: a) a Pressure Ulcer-Associated Osteomyelitis: by evaluating Two-Stage Surgical Strategy along with Prolonged Antimicrobial Therapy by Hospices Civils De Lyon, France, b) Subcutaneous Injection and Ultrasonic Dispersion Of Cefazolin Into Chronic Pelvic-Region Pressure Ulcers In Persons With Spinal Cord Injury by James J. Peters Veterans Affairs Medical Center, c) Changes in Bacterial Flora among patients with Pelvic Bedsores: by a Prospective Pilot Study of Escaflor by Centre Hospitalier Universitaire De Nîmes, Inc., and d) Puraply Antimicrobial Wound Matrix and Wound Management (puraplyam) by Organogenesis.
- Less number of studies is found to be in clinical phase trial developmental stages. Among which, 8 studies are found in phase III stage of development including PRP Concepts Fibrin Bio-Matrix to treat pressure ulcers by PRP Concepts, LLC. And the drugs that come in this pipeline include Ketamine, Midazolam, Liposomal Bupivacaine, Epinephrine, Hyperbaric oxygen, Quadratus Lumborum Block (QLB). James J. Peters Veterans Affairs Medical Center is in the process of developing pioglitazone as a peroxisome proliferator-activated receptor gamma (PPAR γ) agonist for the treatment of pressure ulcers.

- Fundaç?o Cardioinfantil Instituto de Cardiolog?a is also in the process of developing skin dressing for the treatment of pressure ulcer. Aurix is a platelet-rich plasma gel used in the treatment of non-healing chronic wounds. The results of Aurix to date when used to treat Pressure ulcers have been promising.
- The rise in adoption of artificial skin substitutes and an increase in the number of patients with pressure ulcers are going to fuel the growth of the market.
- However, the increasing demand for pressure ulcers treatment products projected to decline during the forecast period leading to high cost of advanced wound care products and also leading to unfavorable reimbursement policies.
- The pressure ulcers market is driven by an increase in the geriatric population increase in the number of pressure ulcers cases among the geriatric population, and surge in demand for dressings, devices, and sealants.
- The growth of the wound care dressings segment is primarily driven by usage of antimicrobial dressings for treatment of pressure ulcers.
