STEM CELL THERAPIES PIPELINE ANALYSIS

- The “Stem cell therapies – Pipeline Insights 2018?” report covers the in-depth analysis of Stem cell therapy drug molecules currently undergoing clinical studies.
- It provides a deep understanding of potential Stem cell therapy drug molecules across all drug development phases. The report assesses the pipeline Stem cell therapy molecules by type of stem cells(allogeneic, autologous), stage of development (discovery, pre-clinical, IND, Phase I, Phase II, Phase III and pre-registration), by recruitment status (recruiting, active not recruiting, completed, NA, and unknown), therapy type (monotherapy, combination products).
- The report provides a snapshot of discontinued and dormant drugs too. Also, the report includes critical insights on other development activities, including (but not limited to) – licensing, collaborations, acquisitions, funding, patent, and regulatory designations.
- The report covers company profiles key players in developing Stem cell therapy drug molecules. The company profile includes essential info on overview, financial highlights, product portfolio, business strategies, and key recent developments.

THE SCOPE OF THE REPORT?

- Provides comprehensive understanding of active Stem cell therapy pipeline drug candidates
- Includes comprehensive pipeline product coverage with segregation by various stages of the pipeline from discovery to late-stage.
- Offers pipeline assessment by monotherapy, combination therapy products, and route of administration
- Provides a comparative analysis of key marketed products and pipeline drug candidates
- Includes detailed pipeline drug profiles covering – product description, chemical

information, molecule type, mechanism of action, route of administration, product safety and efficacy, developers and collaborators

- Provides essential info on players involved in clinical R&D of gene therapy drug candidates.
- Provides in-depth coverage of crucial news related to Stem cell therapy drug molecules, including significant mergers and acquisitions and product development updates such as clinical trial progression updates and regulatory updates.

WHY SHOULD I PURCHASE THIS REPORT?

- To obtain an understanding of the current stem cell therapy pipeline landscape.
- To determine drug development dynamics and leverage it for innovation of novel or repositioned drugs.
- To valuably optimize R&D activities in-line with robust therapeutic drug markets.
- To devise strategic initiatives by identifying prospective partners with progressing projects.
