TCR ENGINEERED T-CELL THERAPY

- The “TCR Engineered T-Cell Therapy – Pipeline Insights 2018?” report covers an in-depth analysis of TCR engineered T-Cell therapy drug molecules currently undergoing clinical studies.
- It provides a deep understanding of potential TCR engineered T-cell therapy drug molecules across all drug development phases.
- The report assesses the pipeline TCR engineered T-cell therapy molecules by stage of development (discovery, pre-clinical, IND, Phase I, Phase II, Phase III and pre-registration), by recruitment status (recruiting, active not recruiting, completed, NA, and unknown), therapy type (monotherapy, combination products) molecule type (small molecules, biologics) and route of administration (oral, IV, and others).
- The report provides a snapshot of discontinued and dormant drugs too. In addition, the report includes key insights on other development activities, including (but not limited to) – licensing, collaborations, acquisitions, funding, patent, and regulatory designations.
- The report covers company profiles key players in developing TCR engineered T-cell therapy drug molecules. The company profile includes key info on overview, financial highlights, product portfolio, business strategies, and key recent developments.

THE SCOPE OF THE REPORT?

- Provides comprehensive understanding about active TCR engineered T-cell therapy pipeline drug candidates
- Includes all-inclusive pipeline product coverage with segregation by various stages of the pipeline from discovery to late-stage.
- Offers pipeline assessment by monotherapy, combination therapy products, and route of administration
- Provides a comparative analysis of key marketed products and pipeline drug candidates
- Includes detailed pipeline drug profiles covering – product description, chemical information, molecule type, mechanism of action, route of administration, product safety and efficacy, developers and collaborators
- Provides key info on players involved in clinical R&D of TCR engineered T-cell therapy drug candidates.
- Provides in-depth coverage of key news related to TCR engineered T-cell therapy drug molecules, including major mergers and acquisitions and product development updates such as clinical trial progression updates and regulatory updates.

WHY SHOULD I PURCHASE THIS REPORT?

- To obtain an understanding of the current TCR engineered T-cell therapy pipeline

landscape.

- To determine drug development dynamics and leverage it for innovation of novel or repositioned drugs.
- To valuably optimize R&D activities in-line with robust therapeutic drug markets.
- To devise strategic initiatives by identifying prospective partners with progressing projects.
