DelveInsight's 'Acute Renal Failure (ARF) - Market Insights, Epidemiology and Market Forecast-2028' report delivers an in-depth understanding of the disease, historical & forecasted epidemiology as well as the market trends of Acute Renal Failure in the United States, EU5 (Germany, Spain, Italy, France and United Kingdom), and Japan.

The Report provides the current treatment practices, emerging drugs, market share of the individual therapies, current and forecasted market size of Acute Renal Failure from 2016 to 2028 segmented by seven major markets. The Report also covers current treatment practice/algorithm, market drivers, market barriers and unmet medical needs to curate best of the opportunities and assess underlying potential of the market.

Geography Covered

The United States

EU5 (Germany, France, Italy, Spain and the United Kingdom)

Japan

Study Period: 2016-2028

Acute Renal Failure - Disease Understanding and Treatment Algorithm

The DelveInsight Acute Renal Failure market report gives the thorough understanding

of Acute Renal Failure by including details such as disease definition, classification, symptoms, etiology, pathophysiology, diagnostic trends. It also provides treatment algorithms and treatment guidelines for Acute Renal Failure in the US, Europe, and Japan.

Acute Renal Failure Epidemiology

The Acute Renal Failure epidemiology division provide the insights about historical and current patient pool and forecasted trend for every 7 major countries. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the DelveInsight report also provides the diagnosed patient pool and their trends along with assumptions undertaken.

The disease epidemiology covered in the report provides historical as well as forecasted epidemiology [incidence population of ARF, Sex-Specific Incident Hospitalization cases and Stage-wise Incidence of Acute Renal Failure] scenario in the 7MM covering United States, EU5 countries (Germany, Spain, Italy, France and United Kingdom) and Japan from 2016-2028.

According to DelveInsight, total incident cases of Acute Renal Failure in 7 major markets are found out to be 1,516,635 in 2016.

Acute Renal Failure Drug Chapters

This segment of the Acute Renal Failure report encloses the detailed analysis of marketed drugs and late stage (Phase-III and Phase-II) pipeline drugs. It also helps to understand the clinical trial details, expressive pharmacological action, agreements and collaborations, approval and patent details, advantages and disadvantages of each included drug and the latest news and press releases.

There are large windows of opportunity for Acute Kidney Injury (AKI): to prevent AKI, to treat AKI after its onset, and to halt progression to ESRD. The pharmaceutical industry is investing on clinical trials conducted in the cardiovascular space, yet is little reluctant to enter the kidney market as the overall market is driven by monitoring system followed by transplantation with a very small therapeutic window. Detailed chapter for upcoming therapies EA-230 (Exponential Biotherapies), Zemiglo (LG Life Sciences), RESCAP (Alloksys), BB3 (Angion Biomedica), QPI-1002 (Quark) and recAP (AM Pharma) have been covered in the report.

Acute Renal Failure Market Outlook

The Acute Renal Failure market outlook of the report helps to build the detailed comprehension of the historic, current and forecasted trend of the market by analyzing the impact of current therapies on the market, unmet needs, drivers and barriers and demand of better technology.

This segment gives a through detail of market trend of each marketed drug and late-

stage pipeline therapy by evaluating their impact based on annual cost of therapy, inclusion and exclusion criteria's, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated market data are presented with relevant tables and graphs to give a clear view of the market at first sight.

According to DelveInsight, the market of Acute Renal Failure in 7MM was found to be USD 8,392 million in 2016, and is expected to increase at a CAGR of XX% from 2016-2028.

Acute Renal Failure Drugs Uptake

This section focusses on the rate of uptake of the potential drugs recently launched in the market or will get launched in the market during the study period from 2016-2028. The analysis covers market uptake by drugs; patient uptake by therapies and sales of each drug.

This helps in understanding the drugs with the most rapid uptake, reasons behind the maximal use of new drugs and allows the comparison of the drugs on the basis of market share and size which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.
