Abstracts

This report can be delivered to the clients within 5-7 Business Days

DelveInsight's 'Age-related Vision Dysfunction - Epidemiology Forecast to 2032' report delivers an in-depth understanding of the disease, historical and forecasted Age-related Vision Dysfunction epidemiology in the 7MM, i.e., the United States, EU5 (Germany, Spain, Italy, France, and the United Kingdom), and Japan.

Geographies Covered

The United States

EU5 (Germany, France, Italy, Spain, and the United Kingdom)

Japan

Study Period: 2019-2032

Age-related Vision Dysfunction Understanding

The DelveInsight Age-related Vision Dysfunction epidemiology report gives a thorough understanding of the Age-related Vision Dysfunction by including details such as disease definition, symptoms, causes, pathophysiology, and diagnosis. It also provides treatment algorithms and treatment guidelines for Age-related Vision Dysfunction in the US, Europe, and Japan. The report covers the detailed information of the Age-related Vision Dysfunction epidemiology scenario in seven major countries (US, EU5, and

Japan).

Age-related Vision Dysfunction Epidemiology Perspective by DelveInsight

The Age-related Vision Dysfunction epidemiology division provides insights about historical and current patient pool and forecasted trend for every seven major countries. The Age-related Vision Dysfunction epidemiology data are studied through all possible division to give a better understanding of the Disease scenario in 7MM. The Age-related Vision Dysfunction epidemiology segment covers the epidemiology data in the US, EU5 countries (Germany, Spain, Italy, France, and the UK), and Japan from 2019 to 2032. It also helps recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

Age-related Vision Dysfunction Detailed Epidemiology Segmentation

The Age-related Vision Dysfunction epidemiology covered in the report provides historical as well as forecasted Age-related Vision Dysfunction epidemiology scenario in the 7MM covering the United States, EU5 countries (Germany, Spain, Italy, France, and the United Kingdom), and Japan from 2019 to 2032.

The DelveInsight Age-related Vision Dysfunction report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

Scope of the Report

The Age-related Vision Dysfunction report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The Age-related Vision Dysfunction Epidemiology Report and Model provide an overview of the global trends of Age-related Vision Dysfunction in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Age-related Vision Dysfunction in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient population

The report assesses the disease risk and burden and highlights the unmet needs of Age-related Vision Dysfunction

The report provides the segmentation of the Age-related Vision Dysfunction epidemiology

Report Highlights

11-year Forecast of Age-related Vision Dysfunction epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Age-related Vision Dysfunction

Cases of Age-related Vision Dysfunction by Mutation Types

Age-related Vision Dysfunction Cases associated with Clinical Manifestations

KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to Age-related Vision Dysfunction?

What are the key findings pertaining to the Age-related Vision Dysfunction epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of Age-related Vision Dysfunction across the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of Age-related Vision Dysfunction?

What are the currently available treatments of Age-related Vision Dysfunction?

Reasons to buy

The Age-related Vision Dysfunction Epidemiology report will allow the user to -

- Develop business strategies by understanding the trends shaping and driving the global Age-related Vision Dysfunction market

- Quantify patient populations in the global Age-related Vision Dysfunction market to improve product design, pricing, and launch plans

- Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for Age-related Vision Dysfunction therapeutics in each of the markets covered

- Understand the magnitude of Age-related Vision Dysfunction population by its epidemiology

The Age-related Vision Dysfunction Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources

Contents

1. KEY INSIGHTS

2. EXECUTIVE SUMMARY OF AGE-RELATED VISION DYSFUNCTION

3. AGE-RELATED VISION DYSFUNCTION: DISEASE BACKGROUND AND OVERVIEW

3.1. Introduction

3.2. Sign and Symptoms

3.3. Pathophysiology

3.4. Risk Factors

3.5. Diagnosis

4. PATIENT JOURNEY

5. EPIDEMIOLOGY AND PATIENT POPULATION

5.1. Epidemiology Key Findings

5.2. Assumptions and Rationale: 7MM

5.3. Epidemiology Scenario: 7MM

5.3.1. Age-related Vision Dysfunction Epidemiology Scenario in the 7MM (2019- 2032)

5.4. United States Epidemiology

5.4.1. Age-related Vision Dysfunction Epidemiology Scenario in the United States (2019- 2032)

5.5. EU-5 Country-wise Epidemiology

5.5.1. Germany Epidemiology

5.5.1.1. Age-related Vision Dysfunction Epidemiology Scenario in Germany (2019- 2032)

5.5.2. France Epidemiology

5.5.2.1. Age-related Vision Dysfunction Epidemiology Scenario in France (2019- 2032)

5.5.3. Italy Epidemiology

5.5.3.1. Age-related Vision Dysfunction Epidemiology Scenario in Italy (2019- 2032)

5.5.4. Spain Epidemiology

5.5.4.1. Age-related Vision Dysfunction Epidemiology Scenario in Spain (2019- 2032)

5.5.5. United Kingdom Epidemiology

5.5.5.1. Age-related Vision Dysfunction Epidemiology Scenario in the United

Kingdom (2019-2032)

5.6. Japan Epidemiology

5.6.1. Age-related Vision Dysfunction Epidemiology Scenario in Japan (2019- 2032)

6. TREATMENT ALGORITHM, CURRENT TREATMENT, AND MEDICAL PRACTICES

6.1. Age-related Vision Dysfunction Treatment and Management

6.2. Age-related Vision Dysfunction Treatment Algorithm

7. KOL VIEWS

8. UNMET NEEDS

9. APPENDIX

9.1. Bibliography

9.2. Report Methodology
