OVERVIEW

Atezolizumab is a cancer immunotherapy, which is a type of treatment that uses the body's own immune system to fight cancer. It is a monoclonal antibody that has been designed to bind a protein called programmed death-ligand 1 (PD-L1). PD-L1 is normally found on the surface of healthy cells, and functions by binding to its receptor PD-1 found on the surface of immune cells called T-cells. This binding sends a signal to the T-cells to stop fighting, ensuring that normal cells are not mistakenly attacked by the immune system. Cancer cells can also produce PD-L1 and evade detection by the immune system. It is being developed by Genentech.

When Atezolizumab binds to PD-L1, which is produced by cancer cells at much higher levels than normal cells, it restores the normal function of the immune system, ensuring

that T-cells recognize, attack, and kill cancer cells.

SCOPE OF THE REPORT

The report provides insights into:

A comprehensive product overview including the product description, mechanism of action, dosage and administration, Research and Development activity.

Elaborated details on regulatory milestones and other development activities have been provided in this report.

The report also highlights the drug research and development activity details across the United States, Europe and Japan.

The report also covers the patents information with expiry timeline around ATEZOLIZUMAB.

The report contains forecasted sales for ATEZOLIZUMAB till 2030.

Comprehensive coverage of the late-stage emerging therapies (Phase III) for Diffuse large B-cell lymphoma (DLBCL).

The report also features the SWOT analysis with analyst insights and key findings of ATEZOLIZUMAB.

METHODOLOGY

The report is built using data and information sourced primarily from internal databases, primary and secondary research and in-house analysis by DelveInsight's team of industry experts. Information and data from the secondary sources have been obtained from various printable and nonprintable sources like search engines, news websites, global regulatory authorities websites, trade journals, white papers, magazines, books, trade associations, industry associations, industry portals and access to available databases.

ATEZOLIZUMAB - Emerging Insight and Market Forecast - 2030

In-depth ATEZOLIZUMAB Market Assessment

This report provides a detailed market assessment of ATEZOLIZUMAB in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan. This segment of the report provides forecasted sales data from 2020 to 2030.

ATEZOLIZUMAB Clinical Assessment

The report provides the clinical trials information of ATEZOLIZUMAB covering trial interventions, trial conditions, trial status, start and completion dates.

REPORT HIGHLIGHTS

In the coming years, the market scenario for Diffuse large B-cell lymphoma (DLBCL) is set to change due to the extensive research and incremental healthcare spending across the world; which would expand the size of the market to enable the drug manufacturers to penetrate more into the market.

The companies and academics are working to assess challenges and seek opportunities that could influence ATEZOLIZUMAB dominance. The therapies under development are focused on novel approaches to treat/improve the disease condition.

Other emerging products for Diffuse large B-cell lymphoma (DLBCL) are giving market competition to ATEZOLIZUMAB and launch of late-stage emerging therapies in the near future will significantly impact the market.

A detailed description of regulatory milestones, development activities, and some key findings provide the current development scenario of ATEZOLIZUMAB.

Our in-depth analysis of the forecasted sales data of ATEZOLIZUMAB from 2020 to 2030 will support the clients in the decision-making process regarding their therapeutic portfolio by identifying the overall scenario of the ATEZOLIZUMAB.

Key Questions

Which company is developing ATEZOLIZUMAB along with the phase of the clinical study?

What is the technology utilized in the development of ATEZOLIZUMAB?

What is the product type, route of administration and mechanism of action of ATEZOLIZUMAB?

What is the clinical trial status of the study and study completion date?

What are the key collaborations, mergers and acquisitions, licensing and other activities related to the ATEZOLIZUMAB development?

What are the key designations that have been granted to ATEZOLIZUMAB?

What is the forecasted market scenario of ATEZOLIZUMAB?

What is the history of ATEZOLIZUMAB and what is its future?

What is the forecasted sales of ATEZOLIZUMAB in the seven major countries, including the United States, Europe (Germany, France, Italy, Spain, and the United Kingdom), and Japan?
