## Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Chronic inflammatory demyelinating polyneuropathy (CIDP) - Pipeline Insight, 2021," report provides comprehensive insights about 10+ companies and 10+ pipeline drugs in Chronic inflammatory demyelinating polyneuropathy (CIDP) pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

## Geography Covered

Global coverage

Chronic inflammatory demyelinating polyneuropathy (CIDP) Understanding

Chronic inflammatory demyelinating polyneuropathy (CIDP): Overview

Chronic inflammatory demyelinating polyneuropathy (CIDP) is a rare neurological disorder which is characterized by inflammation of nerve roots and peripheral nerves in conjunction with destruction of myelin sheath of the nerve fibers. Loss or damage of myelin sheath can slowdown or block the nerve signals. CIDP is an auto-immune disorder with a very low prevalence of around 5-7 cases per 100,000 individuals. Males are more likely to get affected by CIDP as compared to females. At times, diagnosing CIDP can be very difficult. However, muscle weakness for more than two months along

with symmetric proximal and distal weakness with reduced or absent tendon reflexes are highly suggestive of CIDP. There are various effective treatments available for CIDP which primarily consist of glucocorticoids (steroids) like prednisone, some immunosuppressive drugs, intravenous immunoglobulin, and plasma exchange.

“Chronic inflammatory demyelinating polyneuropathy (CIDP) - Pipeline Insight, 2021” report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Chronic inflammatory demyelinating polyneuropathy (CIDP) pipeline landscape is provided which includes the disease overview and Chronic inflammatory demyelinating polyneuropathy (CIDP) treatment guidelines. The assessment part of the report embraces, in depth Chronic inflammatory demyelinating polyneuropathy (CIDP) commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Chronic inflammatory demyelinating polyneuropathy (CIDP) collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

## **Report Highlights**

The companies and academics are working to assess challenges and seek opportunities that could influence Chronic inflammatory demyelinating polyneuropathy (CIDP) R&D. The therapies under development are focused on novel approaches to treat/improve Chronic inflammatory demyelinating polyneuropathy (CIDP).

### **Chronic inflammatory demyelinating polyneuropathy (CIDP) Emerging Drugs Chapters**

This segment of the Chronic inflammatory demyelinating polyneuropathy (CIDP) report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

### **Chronic inflammatory demyelinating polyneuropathy (CIDP) Emerging Drugs**

#### **HYQVIA: Takeda Pharmaceuticals**

Takeda’s lead drug candidate, HYQVIA, is a solution for subcutaneous administration.

The drug is being developed for chronic inflammatory demyelinating polyneuropathy disorder. The drug has demonstrated good efficacy and tolerability. It has also been designated with orphan drug status for CIPD. It act as an immunomodulant that reacts with the receptor of targeted cells to up-regulate or down-regulate immune response.

Rozanolixizumab: UCB Biopharma

UCB Biopharma's "novel" drug molecule Rozanolixizumab is currently being evaluated for the treatment of chronic inflammatory demyelinating polyneuropathy (CIDP). The drug is a neonatal Fc receptor antagonist which belong to the class of anti-inflammatories as well as monoclonal antibodies. Rozanolixizumab works by binding with high-affinity to human neonatal Fc receptor (FcRn), selectively inhibiting IgG rescue and recycling.

Further product details are provided in the report.....

Chronic inflammatory demyelinating polyneuropathy (CIDP): Therapeutic Assessment

This segment of the report provides insights about the different Chronic inflammatory demyelinating polyneuropathy (CIDP) drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Chronic inflammatory demyelinating polyneuropathy (CIDP)

There are approx. 10+ key companies which are developing the therapies for Chronic inflammatory demyelinating polyneuropathy (CIDP). The companies which have their Chronic inflammatory demyelinating polyneuropathy (CIDP) drug candidates in the most advanced stage, i.e. phase III include, Takeda Pharmaceuticals.

## Phases

DelveInsight's report covers around 10+ products under different phases of clinical development like

Late stage products (Phase III)

Mid-stage products (Phase II)

Early-stage product (Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

## **Route of Administration**

Chronic inflammatory demyelinating polyneuropathy (CIDP) pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Oral

Parenteral

intravitreal

Subretinal

Topical.

Molecule Type

Products have been categorized under various Molecule types such as

Monoclonal Antibody

Peptides

Polymer

Small molecule

Gene therapy

## **Product Type**

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

## Chronic inflammatory demyelinating polyneuropathy (CIDP): Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Chronic inflammatory demyelinating polyneuropathy (CIDP) therapeutic drugs key players involved in developing key drugs.

### **Pipeline Development Activities**

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Chronic inflammatory demyelinating polyneuropathy (CIDP) drugs.

## Chronic inflammatory demyelinating polyneuropathy (CIDP) Report Insights

- Chronic inflammatory demyelinating polyneuropathy (CIDP) Pipeline Analysis

- Therapeutic Assessment

- Unmet Needs

- Impact of Drugs

## Chronic inflammatory demyelinating polyneuropathy (CIDP) Report Assessment

- Pipeline Product Profiles

- Therapeutic Assessment

- Pipeline Assessment

- Inactive drugs assessment

- Unmet Needs

## Key Questions

### Current Treatment Scenario and Emerging Therapies:

How many companies are developing Chronic inflammatory demyelinating polyneuropathy (CIDP) drugs?

How many Chronic inflammatory demyelinating polyneuropathy (CIDP) drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Chronic inflammatory demyelinating polyneuropathy (CIDP)?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Chronic inflammatory demyelinating polyneuropathy (CIDP) therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Chronic inflammatory demyelinating polyneuropathy (CIDP) and their status?

What are the key designations that have been granted to the emerging drugs?

## Key Players

Takeda Pharmaceuticals

UCB Biopharma

LFB Biotechnologies

Argenx

Octapharma

## Key Products

HYQVIA

Rozanolixizumab

I10E

Efgartigimod

NewGam
