Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Chronic Otitis Media (COM) - Pipeline Insight, 2021," report provides comprehensive insights about 3+ companies and 3+ pipeline drugs in Chronic Otitis Media (COM) pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

Chronic Otitis Media (COM) Understanding

Chronic Otitis Media (COM): Overview

Chronic otitis media (COM) refers to a chronic infection of the middle ear cavity. It is caused due to an ongoing inflammatory response within the middle ear (with granulation), and is usually associated with unresolved and resistant bacterial infections. The infection can commonly occur in cold weather conditions, or if water enters the middle year. Any other ear infection can also cause this infection. Diagnosis involves physical examination of the patient's ear, nose, and throat. If cholesteatoma is suspected, then it should be further investigated. The treatment options available are aural toileting and topical antibiotic (ciprofloxacin) and steroid drops (dexamethasone).

"Chronic Otitis Media (COM)- Pipeline Insight, 2021" report by DelveInsight outlays

comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Chronic Otitis Media (COM) pipeline landscape is provided which includes the disease overview and Chronic Otitis Media (COM) treatment guidelines. The assessment part of the report embraces, in depth Chronic Otitis Media (COM) commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Chronic Otitis Media (COM) collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Chronic Otitis Media (COM) R&D. The therapies under development are focused on novel approaches to treat/improve Chronic Otitis Media (COM).

Chronic Otitis Media (COM) Emerging Drugs Chapters

This segment of the Chronic Otitis Media (COM) report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

Chronic Otitis Media (COM) Emerging Drugs

Pazufloxacin mesilate: Lee's Pharmaceutical

Pazufloxacin is a fused tricyclic quinolone derivative that has a broad spectrum of antibacterial activity. Pazufloxacin inhibits bot DNA gyrase and topoisomerase IV and has shown in vitro activity against various bacterial species. The drug is in phase 1 of clinical trials for the treatment of chronic suppurative otitis media.

Further product details are provided in the report......

Chronic Otitis Media (COM): Therapeutic Assessment

This segment of the report provides insights about the different Chronic Otitis Media (COM) drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Chronic Otitis Media (COM)

There are approx. 3+ key companies which are developing the therapies for Chronic Otitis Media (COM). The companies which have their Chronic Otitis Media (COM) drug candidates in the mid to advanced stage, i.e. phase III and Phase I include, Lee's Pharmaceutical and others.

Phases

DelveInsight's report covers around 3+ products under different phases of clinical development like

Late-stage products (Phase III)

Mid-stage products (Phase II and Phase I/II)

Early-stage products (Phase I/II and Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

Route of Administration

Chronic Otitis Media (COM) pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Subcutaneous

Intravenous

Oral

Parenteral

Intramuscular				
Molecule Type				
Products have been categorized under various Molecule types such as				
Small molecules				
Peptides				
Polymer				
Gene therapy				
Monoclonal antibodies				
Product Type				
Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.				
Chronic Otitis Media (COM): Pipeline Development Activities				

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Chronic Otitis Media (COM) drugs.

The report provides insights into different therapeutic candidates in phase II, I,

preclinical and discovery stage. It also analyses Chronic Otitis Media (COM) therapeutic

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Chronic Otitis Media (COM) drugs?

How many Chronic Otitis Media (COM) drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Chronic Otitis Media (COM)?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Chronic Otitis Media (COM) therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Chronic Otitis Media (COM) and their status?

What are the key designations that have been granted to the emerging drugs? **Key Players**
