Abstracts

This report can be delivered to the clients within 4-5 Business Days

DelveInsight's, "Deep Brain Stimulation Devices–Pipeline Insight and 2022," report provides comprehensive insights about 20+ companies and 23+ pipeline devices in deep brain stimulation (DBS) devices pipeline landscape. The DBS market is expected to undergo substantial growth in the coming years owing to an increasing prevalence of neurological disorders around the world. The growing aging population is also a major growth factor for DBS devices market as it is more susceptible to neurological disorders like Parkinson's disease, Alzheimer's disease and Epilepsy. Therefore, due to an increase in demand of such devices, huge investment is being made on R&D activities in neurological sector, which is the major reason for an extensive pipeline in this segment.

This reports provides a detailed study of the emerging DBS devices along with competitive landscape to help better understand the emerging DBS devices.

Geography Covered

Global coverage

Deep Brain Stimulation Devices Overview

Deep Brain Stimulation Devices: Understanding

The deep brain stimulation device is a battery-operated, surgically-implanted device. It

is sometimes called a pacemaker for the brain. DBSs are commonly used to treat movement disorders as well as neuropsychiatric disorders. DBS is a therapy that relies on the delivery of mild electrical pulses to specific areas in the brain via an implanted lead connected to a battery-powered pulse generator placed in the patient's upper chest area. A physician is able to vary and control the stimulation delivered through the lead to the brain using an external, hand-held programmer. At present, DBS systems use leads with electrodes that send out electrical current in all direction.

Who needs a deep brain stimulation device?

Patients with the following disorder:

Dystonia

Epilepsy

Essential tremor

Obsessive-compulsive disorder

Parkinson's disease

Deep Brain Stimulation Devices Competitive Assessment

This segment of the deep brain stimulation devices pipeline report encloses its detailed analysis of various pipeline devices which include product description, licensing and collaboration details and other developmental activities including the latest news and press releases. The report also provides list of major players involved in the pipeline product development.

Electrode Material

Two types of materials are used in the implementation of the electrodes: Brittle materials (e.g. Silicon) and ductile materials (e.g. metals and flexible polymers).

Product Application

The DBS devices are used in Parkinson's disease, epilepsy, essential tremor, dystonia and obsessive compulsive disorder.

Major Players in DBS Devices

There are approx. 20+ key companies which are developing the products for DBS devices.

directSTIM DBS System: Aleva Neurotherapeutics SA.

Aleva's revolutionary DBS system incorporates directional electrode technology and is designed to be more precise and efficient, with optimized stimulation that will potentially reduce side effects. At present, Aleva is the only emerging technology company to be awarded the CE-Mark for Deep Brain Stimulation.

Picostim: Bioinduction Ltd

Picostim is in clinical trial phase. It is a miniaturized skull-mounted DBS device which is optimized to generate waveforms needed for stimulation of the subthalamic nucleus (STN) and STN region, employing a unique method of controlling stimulation current. The product undergoing clinical trial and is expected to be completed by 2023. It is a single center, open label, non-randomized design with the primary objective of showing similarity in control of motor symptoms for the Picostim device compared with previously published data for existing DBS devices.

Further product details are provided in the report.....

Deep Brain Stimulation Devices Competitive Benchmarking

This segment of the reports provides analysis of the pipeline report to give a clear understanding of the comparative analysis.

The analysis is based on

Brand Positioning of Leading companies

Application

Industry Collaborations

Deep Brain Stimulation Devices: Commercialization Activity

This segment of the report provides a detailed list of any commercial activity in the field of deep brain stimulator devices ranging from collaboration, mergers and acquisition, recent breakthrough among others.

Development Activities

In August, 2020, the new Percept PC Neurostimulator with BrainSense developed by Medtronic was implanted to a patient in Penn State Health Milton S. Hershey Medical Center which become the first hospital in the state to implant a patient with a more personalized treatment for neurological disease

Medtronic in August 2019 recalled the auto-registration feature of its StealthStation DBS software due to inaccuracies caused by minor patient movements during the auto-registration process when used with NexFrame stereotactic system during a DBS procedure. The problem resulted in 11 reports related to injuries and another 22 related to malfunctions, according to FDA.

Further commercial activities are provided in the report.....

Deep Brain Stimulation Devices: Reimbursement

US

US reimbursement policy, Medicare covers DBS for the treatment of essential tremor and/or Parkinsonian tremor. Medicare only consider DBS devices to be reasonable and necessary if they are Food and Drug Administration (FDA) approved devices used in accordance with FDA approved protocols governing Category B Investigational Device Exemption (IDE) DBS clinical trials.

Further information is provided in the report.....

Report Highlights

Extensive coverage of the DBS devices under development

The report reviews details of major pipeline products which includes, product description, licensing and collaboration details and other developmental activities

The report reviews the major players involved in the development of DBS devices and list all their pipeline projects

The coverage of pipeline products based on various stages of development ranging from Early Development to Approved / Issued stage

The report provides key clinical trial data of ongoing trials specific to pipeline products

Recent developments in the segment / industry

The report consists of in depth analysis of pipeline products based on various parameters

Deep Brain Stimulation Devices Report Insights

Deep Brain Stimulation Devices - Pipeline Analysis

Deep Brain Stimulation Devices - Unmet Need

Deep Brain Stimulation Devices - Market Dynamics

Deep Brain Stimulation Devices - Future Perspectives and Conclusion

Deep Brain Stimulation Devices - Analyst Views

Key Questions

What are significant companies in this segment, their information, analysis, and insights to improve R&D strategies?

How to identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage?

What are important and diverse types of DBS devices under development?

What are market-entry and market expansion strategies in DBS devices?

What are some of the mergers and acquisitions and to identify major players with the most promising pipeline?

What is in-depth analysis of the product's current stage of development, territory and estimated launch date?

Key Players

Adaptive Neuromodulation GmbH

Adept Neuro SA

Aleva Neurotherapeutics SA

Bioinduction Limited

Boston Scientific Corp

Brainsway Ltd

Cleveland Medical Devices Inc

Cortera Neurotechnologies Inc

Deep Brain Innovations, LLC

Enspire DBS Therapy Inc

Functional Neuromodulation Inc.

Medtronic plc

NeuroOne Inc

Nexeon MedSystems Inc

Wedge Therapeutics

Contents

1. KEY INSIGHTS

2. DEEP BRAIN STIMULATION DEVICES: SNAPSHOT

3. DEEP BRAIN STIMULATION DEVICES

3.1. Product Overview

3.2. Regulatory Approvals based on Class

3.3. Indications

3.4. Mechanism

4. DEEP BRAIN STIMULATION DEVICES PROFILES: COMPETITIVE ASSESSMENT

4.1. Assessment by Electrode Material

4.2. Assessment by Application

4.2.1. Parkinson's disease

4.2.2. Epilepsy

4.2.3. Essential Tremor

4.2.4. Dystonia

4.2.5. Obsessive Compulsive Disorder

4.3. Assessment by Company

4.3.1. Aleva Neurotherapeutics SA

4.3.1.1. directSTIM DBS System: Aleva Neurotherapeutics SA

4.3.1.1.1. Product Information

4.3.1.1.2. Research and Development

4.3.1.1.3. Patent Details

4.3.1.1.4. Regulatory Milestone

4.3.2. Bioinduction Ltd

4.3.2.1. Picostim: Bioinduction Ltd

4.3.2.1.1. Product Information

4.3.2.1.2. Research and Development

4.3.2.1.3. Patent Details

4.3.2.1.4. Regulatory Milestone

*More Companies and products would be added in the final report

5. DEEP BRAIN STIMULATION DEVICES: COMPETITIVE BENCHMARKING : BY COMPANY

- 5.1. Brand Positioning of Leading companies
- 5.2. Analysis based on Application
- 5.3. Analysis based on Industry Collaborations

6. DEEP BRAIN STIMULATION DEVICES – COMMERCIALIZATION ACTIVITY

- 6.1. Collaboration
- 6.2. Licensing
- 6.3. Merger and Acquisition
- 6.4. Recent Breakthroughs
- 6.5. Literature Studies
- 6.6. KOL Views

7. DEEP BRAIN STIMULATION DEVICES: REGULATORY

- 7.1. US
- 7.2. Europe
- 7.3. Japan

8. DEEP BRAIN STIMULATION DEVICES: REIMBURSEMENT

- 8.1. Case Study - US
- 8.2. Case Study - Europe
- 8.3. Case Study -Japan

9. DEEP BRAIN STIMULATION DEVICES: MARKET DYNAMICS

- 9.1. Unmet Needs
- 9.2. Market Drivers
- 9.3. Market Barriers

10. DELVEINSIGHT'S ANALYTICAL PERSPECTIVE

- 10.1. PEST Analysis
- 10.2. Future Growth Perspectives

11. CONCLUSION

12. APPENDIX

12.1. Research Methodology

12.1.1. Coverage

12.1.2. Secondary Research
