## Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Familial Mediterranean Fever - Pipeline Insight, 2021," report provides comprehensive insights about 3+ companies and 3+ pipeline drugs in Familial Mediterranean Fever pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

## Geography Covered

Global coverage

## Familial Mediterranean Fever Understanding

### Familial Mediterranean Fever: Overview

Familial Mediterranean fever (FMF) is an inherited auto inflammatory disease characterized by recurrent episodes (attacks) of fever and acute inflammation of the membranes lining the abdomen, joints, and lungs. Some individuals may develop a serious condition known as amyloidosis, in which certain proteins called amyloid accumulates in various tissues of the body. It is caused by mutations of the MEFV gene. There is no cure for FMF, but there are effective treatments. Specific treatments are aimed at the specific symptoms apparent in each individual. Non-steroidal anti-inflammatory drugs (NSAIDs) and pain medications (analgesics) can be used to treat individuals during a febrile or inflammatory episode.

“Familial Mediterranean Fever- Pipeline Insight, 2021” report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Familial Mediterranean Fever pipeline landscape is provided which includes the disease overview and Familial Mediterranean Fever treatment guidelines. The assessment part of the report embraces, in depth Familial Mediterranean Fever commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Familial Mediterranean Fever collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

## **Report Highlights**

The companies and academics are working to assess challenges and seek opportunities that could influence Familial Mediterranean Fever R&D. The therapies under development are focused on novel approaches to treat/improve Familial Mediterranean Fever.

### **Familial Mediterranean Fever Emerging Drugs Chapters**

This segment of the Familial Mediterranean Fever report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

### **Familial Mediterranean Fever Emerging Drugs**

#### **Tocilizumab: Roche**

Tocilizumab is a recombinant humanized monoclonal antibody IL-6 receptor inhibitor used to treat inflammatory and autoimmune conditions.

Further product details are provided in the report.....

### **Familial Mediterranean Fever: Therapeutic Assessment**

This segment of the report provides insights about the different Familial Mediterranean

Fever drugs segregated based on following parameters that define the scope of the report, such as:

### Major Players in Familial Mediterranean Fever

There are approx. 3+ key companies which are developing the therapies for Familial Mediterranean Fever. The companies which have their Familial Mediterranean Fever drug candidates in the mid to advanced stage, i.e. phase III and Phase II include, Roche and others.

### Phases

DelveInsight's report covers around 3+ products under different phases of clinical development like

- Late-stage products (Phase III)

- Mid-stage products (Phase II and Phase I/II)

- Early-stage products (Phase I/II and Phase I) along with the details of

- Pre-clinical and Discovery stage candidates

- Discontinued & Inactive candidates

### Route of Administration

Familial Mediterranean Fever pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

- Subcutaneous

- Intravenous

- Oral

- Parenteral

Intramuscular

Molecule Type

Products have been categorized under various Molecule types such as

Small molecules

Peptides

Polymer

Gene Therapy

Monoclonal antibodies

## **Product Type**

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Familial Mediterranean Fever: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Familial Mediterranean Fever therapeutic drugs key players involved in developing key drugs.

## **Pipeline Development Activities**

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Familial Mediterranean Fever drugs.

## Key Questions

### Current Treatment Scenario and Emerging Therapies:

How many companies are developing Familial Mediterranean Fever drugs?

How many Familial Mediterranean Fever drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Familial Mediterranean Fever?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Familial Mediterranean Fever therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Familial Mediterranean Fever and their status?

What are the key designations that have been granted to the emerging drugs?

### **Key Players**

Roche

### **Key Products**

Tocilizumab
