DelveInsight's, "France Healthcare Outlook 2022," report provides comprehensive insights about healthcare scenario, regulatory policies and reimbursement landscape in France. The report also identifies key trends in the healthcare market and provides insights into the demographic and healthcare infrastructure of the country. Along with this the report also provides a brief look into the trends and segmentation of the pharmaceutical and medical devices market of France.

As per DelveInsight's analysis, France has achieved reputation across the globe in publishing excellence in life and health sciences. Several French public research institutions are among Thomson Reuters 2016 Top Ten Global Innovators and the leading proprietors of patents in European health and biotechnology. Bench-to-bedside study combined with top-level hospital and university engagement is a key to their success. Innovation comes from strong academic and industrial research collaborations. French study is a blend of intellectual expertise, major industrial players and emerging-product and service-specific SMEs. This is the French recipe for attracting talent and for maintaining high standards quality projects and evolving new personalized medicines. France has long provided a bridge linking northern and southern Europe to geographical, economic and linguistic matters. It is the most important agricultural producer in Europe, and one of the leading industrial forces in the world.

France Healthcare Outlook

France, officially the French Republic, north-western European nation. Historically and traditionally among Western world's most important countries, France has also played a very important role in foreign relations, with former colonies in every corner of the globe,

bordered by the Atlantic, the Mediterranean Sea, the Alps and the Pyrenees. It has 66.98 million people, distributed on a territory of 643,801 square kilometers. France GDP growth rate for 2019 was 1.51%.

France has 2,694 healthcare establishments, including 35% public, 39% private and 26% private non-profit, 655 hospital facilities for emergency treatment, 494 of which are public 331 telemedicine projects (renal or heart failure, chronic wounds, diabetes, etc.).

Under the French health care system, treatment is delivered at different types of facilities: private non-hospital care services, hospital-based health care facilities, health and social services, and care homes for elderly or disabled patients. It is based on the freedom of choice of the patient and resident: each patient is free to select their primary care physician ('m?decin traitant'), direct-access provider, health care facility, or residential facility, whether in the public or private sector.

France has an ageing population, which creates new needs and opportunities. In the Paris region, the industry is organized around Soliage, an innovation cluster dedicated to the Silver Economy. This cluster brings together the industry, the hospitals and research institutes to develop innovative products and services for seniors such as home care, domestic systems, emergency care, training of medical staff.

France has also several leading European players in the field of nursing homes, with a strong experience in caring for elderly people with heavy requirements (Alzheimer's disease, psychiatric disorders, etc.).

France Industry Overview Chapter

Pharmaceutical

In an extremely competitive international environment and in a highly innovative and dynamic manner, the French pharmaceutical industry is growing. The consistency of its study growth is highly skilled workforce, its renowned industrial know-how and the ability to respond to evolving business needs, all have rated France as the largest leader in pharmaceutical production. France is at the forefront of innovation in drug development. The French pharmaceutical industry invests 12% of its turnover in R&D.

Medical Device

With over 150 biotech firms dedicated to drug discovery/development and more than

400 CROs, France is a major player in this industry. France is ranked second in Europe, right after Germany, in number of full-time researchers working in the life sciences sector. 40,000 employees work for this industry in France, both for innovative SMEs and for large companies such as Air Liquide, Diagnostic Medical Systems, Thuasne, Urgo, Vygon, etc. The French industry is especially strong in implants, prosthesis and minimally invasive surgery. In medical imaging, several large corporations have chosen France to establish R&D centers. Some SMEs are also at the forefront of innovation in this field: Supersonic Imagine, Mauna Kea Technologies.

Apart from this the report covers some latest information on COVID 19 update and future of healthcare technology in France.

France Healthcare Assessment Chapter
