## Scope of the Report

The Gene therapy in rare diseases report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The Gene therapy in rare diseases Epidemiology Report and Model provide an overview of the global trends of Gene therapy in rare diseases in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Gene therapy in rare diseases in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient

population

The report assesses the disease risk and burden and highlights the unmet needs of Gene therapy in rare diseases

The report provides the segmentation of the Gene therapy in rare diseases epidemiology

## Report Highlights

11-year Forecast of Gene therapy in rare diseases epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Gene therapy in rare diseases

Cases of Gene therapy in rare diseases by Mutation Types

Gene therapy in rare diseases Cases associated with Clinical Manifestations

## KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.
