OVERVIEW

“Givinostat - Emerging Insight and Market Forecast – 2030” report by DelveInsight outlays comprehensive insights of the product indicated for the treatment of its approved condition. A detailed picture of the Givinostat in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan, for the study period 2017–2030 is provided in this report along with a detailed description of the product. The product details covers mechanism of action, dosage and administration, route of synthesis, and pharmacological studies, including product marketed details, regulatory milestones, and other development activities. Further, it also consists of market assessments inclusive of the market forecast, SWOT analysis, and detailed analyst views. It further highlights the market competitors, late-stage emerging therapies, and patent details in the global space.

Givinostat is an HDAC inhibitor currently being developed for the treatment of Duchenne and Becker muscular dystrophies (DMD and BMD). Since Givinostat acts on the pathogenetic events downstream of the genetic defects, it is potentially a treatment for the whole DMD and BMD population and to counter the disease pathogenetic events in all muscular districts. The FDA has granted Givinostat Orphan Drug, and Fast Track designations for the treatment of DMD and BMD. The European Commission has granted Orphan Medicinal Product designation for Givinostat for the treatment of DMD.

SCOPE OF THE REPORT

The report provides insights into:

A comprehensive product overview including the product description, mechanism of action, dosage and administration, route of synthesis, pharmacological studies (pharmacodynamics and pharmacokinetics) and adverse reactions.

Elaborated details on regulatory milestones and other development activities have been provided in this report.

The report also highlights the drug marketed details across the United States, Europe and Japan.

The report also covers the patents information with expiry timeline around Givinostat.
