Abstracts

This report can be delivered to the clients within 48 Hours

DelveInsight's, "Hepatic encephalopathy – Pipeline Insight, 2021," report provides comprehensive insights about 10+ companies and 10+ pipeline drugs in Hepatic encephalopathy pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

Hepatic encephalopathy Understanding

Hepatic encephalopathy: Overview

Hepatic encephalopathy is a decline in brain function that occurs as a result of severe liver disease. Hepatic encephalopathy can be acute (short-term) or chronic (long-term). Symptoms of hepatic encephalopathy differ depending on the underlying cause of the liver damage. There is no specific test used to diagnose hepatic Encephalopathy. A Hepatic Encephalopathy diagnosis is based on a combination of three things: medical history, symptoms, and a thorough clinical exam. Depending on the cause the treatment is aimed at lowering the level of ammonia and other toxins in your blood.

'Hepatic encephalopathy - Pipeline Insight, 2021' report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication.

A detailed picture of the Hepatic encephalopathy pipeline landscape is provided which includes the disease overview and Hepatic encephalopathy treatment guidelines. The assessment part of the report embraces, in depth Hepatic encephalopathy commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Hepatic encephalopathy collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Hepatic encephalopathy R&D. The therapies under development are focused on novel approaches to treat/improve Hepatic encephalopathy.

Hepatic encephalopathy Emerging Drugs Chapters

This segment of the Hepatic encephalopathy report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

Hepatic encephalopathy Emerging Drugs

MNK-6105: Mallinckrodt

MNK-6105 has a novel mechanism of action that may help in eliminating excess ammonia in the bloodstream by excretion through the kidneys. An intravenous form of MNK-6105 is being studied in hospitalized patients with acute hepatic encephalopathy in phase III stage of development.

RBX7455: Rebiotix Inc.

RBX7455 is an oral microbiota-based formulation under the MRT drug platform. The drug is being evaluated in phase II clinical trials for the treatment of patients with Hepatic Encephalopathy.

Further product details are provided in the report.....

Hepatic encephalopathy: Therapeutic Assessment

This segment of the report provides insights about the different Hepatic encephalopathy drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Hepatic encephalopathy

There are approx. 10+ key companies which are developing the therapies for Hepatic encephalopathy. The companies which have their Hepatic encephalopathy drug candidates in the most advanced stage, i.e. phase III include, Mallinckrodt.

Phases

DelveInsight's report covers around 10+ products under different phases of clinical development like

Late stage products (Phase III)

Mid-stage products (Phase II)

Early-stage product (Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

Route of Administration

Hepatic encephalopathy pipeline report provides the therapeutic assessment of the

pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Oral

Subcutaneous

Intravenous

Intramuscular

Molecule Type

Products have been categorized under various Molecule types such as

Bispecific Antibody

Peptides

Small molecule

Gene therapy

Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Hepatic encephalopathy: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Hepatic encephalopathy therapeutic drugs key players involved in developing key drugs.

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger,

licensing along with a thorough therapeutic assessment of emerging Hepatic encephalopathy drugs.

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Hepatic encephalopathy drugs?

How many Hepatic encephalopathy drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Hepatic encephalopathy?

What are the key collaborations (Industry–Industry, Industry–Academia),

Mergers and acquisitions, licensing activities related to the Hepatic encephalopathy therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Hepatic encephalopathy and their status?

What are the key designations that have been granted to the emerging drugs?
