Abstracts

This report can be delivered to the clients within 5-7 Business Days

DelveInsight's 'HIV-associated Lipodystrophy - Epidemiology Forecast to 2032' report delivers an in-depth understanding of the disease, historical and forecasted HIV-associated Lipodystrophy epidemiology in the 7MM, i.e., the United States, EU5 (Germany, Spain, Italy, France, and the United Kingdom), and Japan.

Geographies Covered

The United States

EU5 (Germany, France, Italy, Spain, and the United Kingdom)

Japan

Study Period: 2019-2032

HIV-associated Lipodystrophy Understanding

The DelveInsight HIV-associated Lipodystrophy epidemiology report gives a thorough understanding of the HIV-associated Lipodystrophy by including details such as disease definition, symptoms, causes, pathophysiology, and diagnosis. It also provides treatment algorithms and treatment guidelines for HIV-associated Lipodystrophy in the US, Europe, and Japan. The report covers the detailed information of the HIV-associated Lipodystrophy epidemiology scenario in seven major countries (US, EU5,

and Japan).

HIV-associated Lipodystrophy Epidemiology Perspective by DelveInsight

The HIV-associated Lipodystrophy epidemiology division provides insights about historical and current patient pool and forecasted trend for every seven major countries. The HIV-associated Lipodystrophy epidemiology data are studied through all possible division to give a better understanding of the Disease scenario in 7MM. The HIV-associated Lipodystrophy epidemiology segment covers the epidemiology data in the US, EU5 countries (Germany, Spain, Italy, France, and the UK), and Japan from 2019 to 2032. It also helps recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

HIV-associated Lipodystrophy Detailed Epidemiology Segmentation

The HIV-associated Lipodystrophy epidemiology covered in the report provides historical as well as forecasted HIV-associated Lipodystrophy epidemiology scenario in the 7MM covering the United States, EU5 countries (Germany, Spain, Italy, France, and the United Kingdom), and Japan from 2019 to 2032.

The DelveInsight HIV-associated Lipodystrophy report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

Scope of the Report

The HIV-associated Lipodystrophy report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The HIV-associated Lipodystrophy Epidemiology Report and Model provide an overview of the global trends of HIV-associated Lipodystrophy in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of HIV-associated Lipodystrophy in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient population

The report assesses the disease risk and burden and highlights the unmet needs of HIV-associated Lipodystrophy

The report provides the segmentation of the HIV-associated Lipodystrophy epidemiology

Report Highlights

11-year Forecast of HIV-associated Lipodystrophy epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of HIV-associated Lipodystrophy

Cases of HIV-associated Lipodystrophy by Mutation Types

HIV-associated Lipodystrophy Cases associated with Clinical Manifestations

KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to HIV-associated Lipodystrophy?

What are the key findings pertaining to the HIV-associated Lipodystrophy epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of HIV-associated Lipodystrophy across the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of HIV-associated Lipodystrophy?

What are the currently available treatments of HIV-associated Lipodystrophy?

Reasons to buy

The HIV-associated Lipodystrophy Epidemiology report will allow the user to -

Develop business strategies by understanding the trends shaping and driving the global HIV-associated Lipodystrophy market

Quantify patient populations in the global HIV-associated Lipodystrophy market to improve product design, pricing, and launch plans

Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for HIV-associated Lipodystrophy therapeutics in each of the markets covered

Understand the magnitude of HIV-associated Lipodystrophy population by its epidemiology

The HIV-associated Lipodystrophy Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources

Key Assessments

Patient Segmentation

Disease Risk & Burden

Risk of disease by the segmentation

Factors driving growth in a specific patient population

Contents

1. KEY INSIGHTS

2. EXECUTIVE SUMMARY OF HIV-ASSOCIATED LIPODYSTROPHY

3. HIV-ASSOCIATED LIPODYSTROPHY: DISEASE BACKGROUND AND OVERVIEW

3.1. Introduction

3.2. Sign and Symptoms

3.3. Pathophysiology

3.4. Risk Factors

3.5. Diagnosis

4. PATIENT JOURNEY

5. EPIDEMIOLOGY AND PATIENT POPULATION

5.1. Epidemiology Key Findings

5.2. Assumptions and Rationale: 7MM

5.3. Epidemiology Scenario: 7MM

5.3.1. HIV-associated Lipodystrophy Epidemiology Scenario in the 7MM (2019- 2032)

5.4. United States Epidemiology

5.4.1. HIV-associated Lipodystrophy Epidemiology Scenario in the United States (2019- 2032)

5.5. EU-5 Country-wise Epidemiology

5.5.1. Germany Epidemiology

5.5.1.1. HIV-associated Lipodystrophy Epidemiology Scenario in Germany (2019- 2032)

5.5.2. France Epidemiology

5.5.2.1. HIV-associated Lipodystrophy Epidemiology Scenario in France (2019- 2032)

5.5.3. Italy Epidemiology

5.5.3.1. HIV-associated Lipodystrophy Epidemiology Scenario in Italy (2019- 2032)

5.5.4. Spain Epidemiology

5.5.4.1. HIV-associated Lipodystrophy Epidemiology Scenario in Spain (2019- 2032)

5.5.5. United Kingdom Epidemiology

5.5.5.1. HIV-associated Lipodystrophy Epidemiology Scenario in the United Kingdom (2019-2032)

5.6. Japan Epidemiology

5.6.1. HIV-associated Lipodystrophy Epidemiology Scenario in Japan (2019- 2032)

6. TREATMENT ALGORITHM, CURRENT TREATMENT, AND MEDICAL PRACTICES

6.1. HIV-associated Lipodystrophy Treatment and Management

6.2. HIV-associated Lipodystrophy Treatment Algorithm

7. KOL VIEWS

8. UNMET NEEDS

9. APPENDIX

9.1. Bibliography

9.2. Report Methodology

10. DELVEINSIGHT CAPABILITIES

11. DISCLAIMER

12. ABOUT DELVEINSIGHT

*The table of contents is not exhaustive; will be provided in the final report
