Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Hodgkin's Lymphoma - Pipeline Insight, 2021," report provides comprehensive insights about 10+ companies and 10+ pipeline drugs in Hodgkin's Lymphoma pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

Hodgkin's Lymphoma Understanding

Hodgkin's Lymphoma: Overview

Hodgkin's Lymphoma also known as Hodgkin's disease is a type of blood cancer that initiate in the lymphatic system (part of immune system that help to get rid of waste and fight against infections). This disease is the most common type of cancer of lymphatic system. Hodgkin disease originate in the WBCs and grow abnormally and spread beyond the lymphatic system. As the disease progress it invades into other organs and can damage their function. Hodgkin's lymphoma are more common in men than women and affect individuals between the age of 15-40 and above 55 years. The exact etiology of Hodgkin's Lymphoma is not clear however, DNA mutation, and infection of Epstein-Barr virus (EBV), which causes mononucleosis can be the reason behind the development of Hodgkin's lymphoma.

“Hodgkin’s Lymphoma - Pipeline Insight, 2021” report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Hodgkin’s Lymphoma pipeline landscape is provided which includes the disease overview and Hodgkin’s Lymphoma treatment guidelines. The assessment part of the report embraces, in depth Hodgkin’s Lymphoma commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Hodgkin’s Lymphoma collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Hodgkin’s Lymphoma R&D. The therapies under development are focused on novel approaches to treat/improve Hodgkin’s Lymphoma.

Hodgkin’s Lymphoma Emerging Drugs Chapters

This segment of the Hodgkin’s Lymphoma report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

Hodgkin’s Lymphoma Emerging Drugs

AFM 13: Affimed Therapeutics

Affimed Therapeutics’ new drug candidate, AFM 13, is a type of immunotherapy, currently in the development stage for the treatment of Hodgkin’s disease. Phase I data demonstrated good efficacy, and tolerability. The drug has been designated with orphan drug status. The drug does not kill cancer cells directly but encourages the body’s own immune system to seek out and destroy the cells. It works by activating a type of immune cell, called a natural killer (NK) cell, and directing them to destroy the cancerous cells.

Camidanlumab tesirine: ACD Therapeutics

ACD Therapeutics “breakthrough” drug carnidanlumab tesirine is currently being evaluated for the treatment of Hodgkin’s lymphoma and has demonstrated safety and efficacy in phase I trials. It is an antibody drug conjugate against CD25 expressed on the surface of cancerous cells.

Further product details are provided in the report.....

Hodgkin’s Lymphoma: Therapeutic Assessment

This segment of the report provides insights about the different Hodgkin’s Lymphoma drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Hodgkin’s Lymphoma

There are approx. 10+ key companies which are developing the therapies for Hodgkin’s Lymphoma. The companies which have their Hodgkin’s Lymphoma drug candidates in the mid to advanced stage, i.e. phase III and Phase II include, Affimed Therapeutics and others.

Phases

DelveInsight’s report covers around 10+ products under different phases of clinical development like

Mid-stage products (Phase II and Phase I/II)

Early-stage products (Phase I/II and Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

Route of Administration

Hodgkin’s Lymphoma pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under

various ROAs such as

Subcutaneous

Intravenous

Oral

Intramuscular

Molecule Type

Products have been categorized under various Molecule types such as

Small molecules

Natural metabolites

Monoclonal antibodies

Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Hodgkin's Lymphoma: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Hodgkin's Lymphoma therapeutic drugs key players involved in developing key drugs.

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Hodgkin's Lymphoma drugs.

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Hodgkin's Lymphoma drugs?

How many Hodgkin's Lymphoma drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Hodgkin's Lymphoma?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Hodgkin's Lymphoma therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Hodgkin's Lymphoma and their status?

What are the key designations that have been granted to the emerging drugs?

Key Players

Affimed Therapeutics

ACD Therapeutics

Cstone Pharmaceuticals

4SC

TG Therapeutics
