## Abstracts

This report can be delivered to the clients within 24 hours

DelveInsight's 'House Dust Mite Allergy - Market Insights, Epidemiology and Market Forecast-2027' report delivers an in-depth understanding of the disease, historical & forecasted epidemiology trends in the United States, EU5 (Germany, Spain, Italy, France and United Kingdom), and Japan.

The Report provides the current treatment practices, emerging drugs, market share of the individual therapies, current and forecasted market size of House Dust Mite Allergy from 2016 to 2027 segmented by the US, EU-5 countries and Japan. The Report also covers current treatment practice/algorithm, market drivers, market barriers and unmet medical needs to curate best of the opportunities and assess underlying potential of the market.

### Geography Covered

The United States

EU5 (Germany, France, Italy, Spain and the United Kingdom)

Japan

Study Period: 2016-2027

House Dust Mite Allergy - Disease Understanding and Treatment Algorithm

The DelveInsight House Dust Mite Allergy market report gives the thorough understanding of the House Dust Mite Allergy by including details such as disease definition, classification, symptoms, etiology, pathophysiology, diagnostic trends, treatment algorithms and treatment guidelines in the US, Europe, and Japan.

### House Dust Mite Allergy Epidemiology

The House Dust Mite Allergy epidemiology division provide the insights about historical and current patient pool and forecasted trend for every 7 major countries. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the DelveInsight report also provides the diagnosed and treatable patient pool and their trends along with assumptions undertaken.

The disease epidemiology covered in the report is segmented into two parts: Total Prevalent Population of Respiratory Allergy and Total Prevalence of House Dust Mite (HDM) Induced Respiratory Allergies in 7 Major Markets [United States and EU5 (Germany, Spain, Italy, France and United Kingdom) and Japan].

According to DelveInsight, the prevalent cases of House Dust Mite Induced Respiratory Allergy was 50,703,100 in 2016 in 7MM and, is expected to increase at a CAGR of XX% during the study period i.e., 2016-2027. Among 7MM, United States account for highest prevalent cases of House Dust Mite Allergy with 69,310,852 prevalent cases in 2016.

### House Dust Mite Allergy Drug Chapters

This segment of the House Dust Mite Allergy report encloses the detailed analysis of marketed drugs. It also helps to understand the clinical trial details, expressive pharmacological action, agreements and collaborations, approval and patent details, advantages and disadvantages of each included drug and the latest news and press releases.

House Mite Allergy is a hypersensitive (IgE mediated) reaction to proteins in the excrement of dust mites. These proteins can cause an allergic reaction in the respiratory passages causing the symptoms of hay fever and asthma. It can often aggravate atopic dermatitis (eczema) in people who have this problem, causing facial eczema that can be difficult to treat. Odactra by Merck Sharp & Dohme Corp. and Actair by Shionogi & Co. are currently approved therapies for House Dust Mite Allergies.

## House Dust Mite Allergy Market Outlook

The House Dust Mite Allergy market outlook of the report helps to build the detailed comprehension of the historic, current and forecasted trend of the market by analyzing the impact of current therapies on the market, unmet needs, drivers and barriers and demand of better technology.

This segment gives a through detail of market trend of each marketed drug and late-stage pipeline therapy by evaluating their impact based on annual cost of therapy, inclusion and exclusion criteria's, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated market data are presented with relevant tables and graphs to give a clear view of the market at first sight.

The report provides global market share of House Dust Mite Allergy i.e., 7 Major Markets [United States and EU5 (Germany, Spain, Italy, France and United Kingdom)] and Japan. In 2016, global market size of House Dust Mite Allergy was USD 258 million and, is expected to grow at a CAGR of XX% during the forecast period of 2018-2027.

The region-wise market size for House Dust Mite Allergy in US, EU-5 countries (Germany, France, Italy, Spain and the U.K.) and Japan shows highest market size in US, followed by Germany, the lowest being in the Spain.
