Abstracts

This report can be delivered to the clients within 24 hours

DelveInsight's, "Inflammation and Pain Post Cataract Surgery – Pipeline Insight, 2021," report provides comprehensive insights about 3+ companies and 3+ pipeline drugs in Inflammation and Pain Post Cataract Surgery pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

Inflammation and Pain Post Cataract Surgery Understanding

Inflammation and Pain Post Cataract Surgery: Overview

A cataract is a dense cloudy area that forms in the lens of the eye. The problem is common in older people. It is the most common cause of vision loss in developed and developing countries. Cataract surgery is the most commonly performed surgical procedure. The minimally invasive cataract surgery technique with phacoemulsification is considered to be a minor procedure with less complications. However, post-operative problems such as ocular pain and inflammation can cause some problems. Despite surgical advances, post-cataract surgery inflammation is still a common cause of patient discomfort, delayed recovery and reduced visual outcome.

'Inflammation and Pain Post Cataract Surgery - Pipeline Insight, 2021' report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Inflammation and Pain Post Cataract Surgery pipeline landscape is provided which includes the disease overview and Inflammation and Pain Post Cataract Surgery treatment guidelines. The assessment part of the report embraces, in depth Inflammation and Pain Post Cataract Surgery commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Inflammation and Pain Post Cataract Surgery collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Inflammation and Pain Post Cataract Surgery R&D. The therapies under development are focused on novel approaches to treat/improve Inflammation and Pain Post Cataract Surgery.

Inflammation and Pain Post Cataract Surgery Emerging Drugs Chapters

This segment of the Inflammation and Pain Post Cataract Surgery report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

Inflammation and Pain Post Cataract Surgery Emerging Drugs

APP13007: Formosa Pharmaceuticals

APP13007 derived from our proprietary APNT formulation platform, is an aqueous-based ophthalmic nanosuspension positioned for the treatment of post-operative pain and inflammatory eye conditions. The active ingredient in APP13007 is a potent corticosteroid agent whose efficacy and safety for dermatological use has been well

established for more than 30 years in the US, Europe, and Japan. APP13007 will represent the first ophthalmic application of the known API. APP13007 completed Phase II studies in 2020 and has just started Phase III studies in the United States in March, 2021.

Further product details are provided in the report.....

Inflammation and Pain Post Cataract Surgery: Therapeutic Assessment

This segment of the report provides insights about the different Inflammation and Pain Post Cataract Surgery drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Inflammation and Pain Post Cataract Surgery

There are approx. 3+ key companies which are developing the therapies for Inflammation and Pain Post Cataract Surgery. The companies which have their Inflammation and Pain Post Cataract Surgery drug candidates in the most advanced stage, i.e. Phase III include, Formosa Pharmaceuticals.

Phases

DelveInsight's report covers around 3+ products under different phases of clinical development like

Late stage products (Phase III)

Mid-stage products (Phase II)

Early-stage product (Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

Route of Administration

Inflammation and Pain Post Cataract Surgery pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Oral

Parenteral

Intravenous

Subcutaneous

Topical.

Molecule Type

Products have been categorized under various Molecule types such as

Monoclonal Antibody

Peptides

Polymer

Small molecule

Gene therapy

Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Inflammation and Pain Post Cataract Surgery: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Inflammation and Pain Post Cataract

Surgery therapeutic drugs key players involved in developing key drugs.

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Inflammation and Pain Post Cataract Surgery drugs.

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Inflammation and Pain Post Cataract Surgery drugs?

How many Inflammation and Pain Post Cataract Surgery drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Inflammation and Pain Post Cataract Surgery?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Inflammation and Pain Post Cataract Surgery therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Inflammation and Pain Post Cataract Surgery and their status?

What are the key designations that have been granted to the emerging drugs?
