Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Inter Alpha Inhibitor Proteins – Pipeline Insight, 2021," report provides comprehensive insights about 3+ companies and 3+ pipeline drugs in Inter Alpha Inhibitor Proteins pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

Inter Alpha Inhibitor Proteins Understanding

Inter Alpha Inhibitor Proteins: Overview

Inter alpha inhibitor proteins (IAIPs) are a family of structurally related proteins found in mammalian plasma in relatively high concentrations. IAIPs play important roles in inflammation as part of innate immunity, wound healing, and cancer metastasis. The major forms found in human plasma are inter-alpha inhibitor (IaI), which consists of two heavy chains (H1 and H2) and a single light chain, and pre-alpha inhibitor (PaI), which consists of one heavy (H3) and one light chain. The light chain (bikunin) is known to inhibit several serine proteases, such as trypsin, human leukocyte elastase, plasmin, and cathepsin G. The liver is the major site of synthesis of the heavy and light chains of IAIP. The high levels of circulating IAIPs normally found in plasma of adults and newborns, and even in prematurely born infants.

“Inter Alpha Inhibitor Proteins - Pipeline Insight, 2021” report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Inter Alpha Inhibitor Proteins pipeline landscape is provided which includes the disease overview and Inter Alpha Inhibitor Proteins treatment guidelines. The assessment part of the report embraces, in depth Inter Alpha Inhibitor Proteins commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Inter Alpha Inhibitor Proteins collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Inter Alpha Inhibitor Proteins R&D. The therapies under development are focused on novel approaches to treat/improve Inter Alpha Inhibitor Proteins.

Inter Alpha Inhibitor Proteins Emerging Drugs Chapters

This segment of the Inter Alpha Inhibitor Proteins report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

Inter Alpha Inhibitor Proteins Emerging Drugs

Novel Plasma-Derived Therapy Based on Inter-alpha Inhibitor Proteins (IAIP): ProThera Biologics

IAIPs are naturally occurring proteins that circulate in the blood, and extensive research at ProThera has shown that these proteins play an essential role in human health by controlling inflammation. They exert their anti-inflammatory effects through multiple mechanisms and have the potential to change the paradigm of treatment for patients with dysregulated immune responses. Prothera Biologics in collaboration with Takeda is leading the development of IAIPs Therapy

Further product details are provided in the report.....

Inter Alpha Inhibitor Proteins: Therapeutic Assessment

This segment of the report provides insights about the different Inter Alpha Inhibitor Proteins drugs segregated based on following parameters that define the scope of the report, such as:

Major Players in Inter Alpha Inhibitor Proteins

There are approx. 3+ key companies which are developing the therapies for Inter Alpha Inhibitor Proteins. The companies which have their Inter Alpha Inhibitor Proteins drug candidates in the most advanced stage, i.e. preclinical phase include ProThera Biologics.

Phases

DelveInsight's report covers around 3+ products under different phases of clinical development like

- Late stage products (Phase III)

- Mid-stage products (Phase II)

- Early-stage product (Phase I) along with the details of

- Pre-clinical and Discovery stage candidates

- Discontinued & Inactive candidates

Route of Administration

Inter Alpha Inhibitor Proteins pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

- Subcutaneous

Intravenous

Intramuscular

Molecule Type

Products have been categorized under various Molecule types such as

Peptides

Polymer

Small molecule

Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Inter Alpha Inhibitor Proteins: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Inter Alpha Inhibitor Proteins therapeutic drugs key players involved in developing key drugs.

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Inter Alpha Inhibitor Proteins drugs.

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Inter Alpha Inhibitor Proteins drugs?

How many Inter Alpha Inhibitor Proteins drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Inter Alpha Inhibitor Proteins?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Inter Alpha Inhibitor Proteins therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Inter Alpha Inhibitor Proteins and their

status?

What are the key designations that have been granted to the emerging drugs?

Key Players

ProThera Biologics

Takeda

Prometic Life science Inc
