Abstracts

This report can be delivered to the clients within 5-7 Business Days

DelveInsight's 'Intermittent Claudication - Epidemiology Forecast to 2032' report delivers an in-depth understanding of the disease, historical and forecasted Intermittent Claudication epidemiology in the 7MM, i.e., the United States, EU5 (Germany, Spain, Italy, France, and the United Kingdom), and Japan.

Geographies Covered

The United States

EU5 (Germany, France, Italy, Spain, and the United Kingdom)

Japan

Study Period: 2019-2032

Intermittent Claudication Understanding

The DelveInsight Intermittent Claudication epidemiology report gives a thorough understanding of the Intermittent Claudication by including details such as disease definition, symptoms, causes, pathophysiology, and diagnosis. It also provides treatment algorithms and treatment guidelines for Intermittent Claudication in the US, Europe, and Japan. The report covers the detailed information of the Intermittent Claudication epidemiology scenario in seven major countries (US, EU5, and Japan).

Intermittent Claudication Epidemiology Perspective by DelveInsight

The Intermittent Claudication epidemiology division provides insights about historical and current patient pool and forecasted trend for every seven major countries. The Intermittent Claudication epidemiology data are studied through all possible division to give a better understanding of the Disease scenario in 7MM. The Intermittent Claudication epidemiology segment covers the epidemiology data in the US, EU5 countries (Germany, Spain, Italy, France, and the UK), and Japan from 2019 to 2032. It also helps recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

Intermittent Claudication Detailed Epidemiology Segmentation

The Intermittent Claudication epidemiology covered in the report provides historical as well as forecasted Intermittent Claudication epidemiology scenario in the 7MM covering the United States, EU5 countries (Germany, Spain, Italy, France, and the United Kingdom), and Japan from 2019 to 2032.

The DelveInsight Intermittent Claudication report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

Scope of the Report

The Intermittent Claudication report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The Intermittent Claudication Epidemiology Report and Model provide an overview of the global trends of Intermittent Claudication in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Intermittent Claudication in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient

population

The report assesses the disease risk and burden and highlights the unmet needs of Intermittent Claudication

The report provides the segmentation of the Intermittent Claudication epidemiology

Report Highlights

11-year Forecast of Intermittent Claudication epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Intermittent Claudication

Cases of Intermittent Claudication by Mutation Types

Intermittent Claudication Cases associated with Clinical Manifestations

KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to Intermittent Claudication?

What are the key findings pertaining to the Intermittent Claudication epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of Intermittent Claudication across

the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of Intermittent Claudication?

What are the currently available treatments of Intermittent Claudication?

Reasons to buy

The Intermittent Claudication Epidemiology report will allow the user to -

Develop business strategies by understanding the trends shaping and driving the global Intermittent Claudication market

Quantify patient populations in the global Intermittent Claudication market to improve product design, pricing, and launch plans

Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for Intermittent Claudication therapeutics in each of the markets covered

Understand the magnitude of Intermittent Claudication population by its epidemiology

The Intermittent Claudication Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources

Key Assessments

Patient Segmentation

Disease Risk & Burden

Risk of disease by the segmentation

Factors driving growth in a specific patient population

Contents

1. KEY INSIGHTS

2. EXECUTIVE SUMMARY OF INTERMITTENT CLAUDICATION

3. INTERMITTENT CLAUDICATION: DISEASE BACKGROUND AND OVERVIEW

3.1. Introduction

3.2. Sign and Symptoms

3.3. Pathophysiology

3.4. Risk Factors

3.5. Diagnosis

4. PATIENT JOURNEY

5. EPIDEMIOLOGY AND PATIENT POPULATION

5.1. Epidemiology Key Findings

5.2. Assumptions and Rationale: 7MM

5.3. Epidemiology Scenario: 7MM

5.3.1. Intermittent Claudication Epidemiology Scenario in the 7MM (2019- 2032)

5.4. United States Epidemiology

5.4.1. Intermittent Claudication Epidemiology Scenario in the United States (2019-2032)

5.5. EU-5 Country-wise Epidemiology

5.5.1. Germany Epidemiology

5.5.1.1. Intermittent Claudication Epidemiology Scenario in Germany (2019- 2032)

5.5.2. France Epidemiology

5.5.2.1. Intermittent Claudication Epidemiology Scenario in France (2019- 2032)

5.5.3. Italy Epidemiology

5.5.3.1. Intermittent Claudication Epidemiology Scenario in Italy (2019- 2032)

5.5.4. Spain Epidemiology

5.5.4.1. Intermittent Claudication Epidemiology Scenario in Spain (2019- 2032)

5.5.5. United Kingdom Epidemiology

5.5.5.1. Intermittent Claudication Epidemiology Scenario in the United Kingdom (2019-2032)

5.6. Japan Epidemiology

5.6.1. Intermittent Claudication Epidemiology Scenario in Japan (2019- 2032)

6. TREATMENT ALGORITHM, CURRENT TREATMENT, AND MEDICAL PRACTICES

6.1. Intermittent Claudication Treatment and Management

6.2. Intermittent Claudication Treatment Algorithm

7. KOL VIEWS

8. UNMET NEEDS

9. APPENDIX

9.1. Bibliography

9.2. Report Methodology

10. DELVEINSIGHT CAPABILITIES

11. DISCLAIMER

12. ABOUT DELVEINSIGHT

*The table of contents is not exhaustive; will be provided in the final report
