Abstracts

This report can be delivered to the clients within 48 hours

DelveInsight's, "MALT1 protein inhibitors - Pipeline Insight, 2022" report provides comprehensive insights about 5+ companies and 5+ pipeline drugs in MALT1 protein inhibitors pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

Geography Covered

Global coverage

MALT1 protein inhibitors Understanding

MALT1 protein inhibitors: Overview

Mucosa-associated lymphoid tissue lymphoma translocation protein 1 is a protein that in humans is encoded by the MALT1 gene. MALT1 is a paracaspase, which is related to the caspase (cysteine-aspartic proteases) family of proteases but cleaves after Arg residues instead of Asp. MALT1 cleavage activity is linked to the pathogenesis of activated B cell-like diffuse large B cell lymphoma (ABC-DLBCL), a chemoresistant form of DLBCL. MALT1 is a unique paracaspase protein that transduces aberrant oncogenic signaling in ABC-DLBCL. MALT1 represents a potentially important therapeutic target for ABC-DLBCL and MALT lymphoma. MALT1 small molecule inhibitors might be useful chemical tools for studying MALT1 biology and treating MALT1-addicted tumors.

'MALT1 protein inhibitors - Pipeline Insight, 2022' report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the MALT1 protein inhibitors pipeline landscape is provided which includes the disease overview and MALT1 protein inhibitors treatment guidelines. The assessment part of the report embraces, in depth MALT1 protein inhibitors commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, MALT1 protein inhibitors collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

Report Highlights

? The companies and academics are working to assess challenges and seek opportunities that could influence MALT1 protein inhibitors R&D. The therapies under development are focused on novel approaches to treat/improve MALT1 protein inhibitors.

MALT1 protein inhibitors Emerging Drugs Chapters

This segment of the MALT1 protein inhibitors report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

MALT1 protein inhibitors Emerging Drugs

MPT-0118: Monopteros Therapeutics

MPT-0118, a first-in-class MALT1 inhibitor for the treatment of solid tumors, has dosed the first patient in its Phase 1/1b dose escalation and cohort expansion clinical trial. Inhibition of MALT1 results in the selective reprogramming of the tumor-associated Tregs, characterized by the loss of their immunosuppressive function and pro-inflammatory interferon-gamma production. Treg reprogramming through MPT-0118 therefore has the potential to enable a powerful anti-tumor immune attack in cancer patients that are otherwise not responsive to checkpoint inhibitor therapy.

Further product details are provided in the report.....

MALT1 protein inhibitors: Therapeutic Assessment

This segment of the report provides insights about the different MALT1 protein inhibitors drugs segregated based on following parameters that define the scope of the report, such as:

? Major Players in MALT1 protein inhibitors

There are approx. 5+ key companies which are developing the therapies for MALT1 protein inhibitors. The companies which have their MALT1 protein inhibitors drug candidates in the most advanced stage, i.e. phase I include Monopteros Therapeutics.

? Phases

DelveInsight's report covers around 5+ products under different phases of clinical development like

- Late stage products (Phase III)

- Mid-stage products (Phase II)

- Early-stage product (Phase I) along with the details of

- Pre-clinical and Discovery stage candidates

- Discontinued & Inactive candidates

? Route of Administration

MALT1 protein inhibitors pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

- Subcutaneous

- Intravenous

Intramuscular

? Molecule Type

Products have been categorized under various Molecule types such as

Peptides

Polymer

Small molecule

? Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

MALT1 protein inhibitors: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses MALT1 protein inhibitors therapeutic drugs key players involved in developing key drugs.

Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging MALT1 protein inhibitors drugs.

Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing MALT1 protein inhibitors drugs?

How many MALT1 protein inhibitors drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of MALT1 protein inhibitors?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the MALT1 protein inhibitors therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for MALT1 protein inhibitors and their status?

What are the key designations that have been granted to the emerging drugs?
