### Scope of the Report

The Musculoskeletal Pain report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The Musculoskeletal Pain Epidemiology Report and Model provide an overview of the global trends of Musculoskeletal Pain in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Musculoskeletal Pain in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient population

The report assesses the disease risk and burden and highlights the unmet needs of Musculoskeletal Pain

The report provides the segmentation of the Musculoskeletal Pain epidemiology

## Report Highlights

11-year Forecast of Musculoskeletal Pain epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Musculoskeletal Pain

Cases of Musculoskeletal Pain by Mutation Types

Musculoskeletal Pain Cases associated with Clinical Manifestations

## KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

## Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to Musculoskeletal Pain?

What are the key findings pertaining to the Musculoskeletal Pain epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of Musculoskeletal Pain across the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of

patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of Musculoskeletal Pain?

What are the currently available treatments of Musculoskeletal Pain?

## Reasons to buy

The Musculoskeletal Pain Epidemiology report will allow the user to -

Develop business strategies by understanding the trends shaping and driving the global Musculoskeletal Pain market

Quantify patient populations in the global Musculoskeletal Pain market to improve product design, pricing, and launch plans

Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for Musculoskeletal Pain therapeutics in each of the markets covered

Understand the magnitude of Musculoskeletal Pain population by its epidemiology

The Musculoskeletal Pain Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources
