DelveInsight's 'Neuroblastoma (NB)- Epidemiology Forecast to 2028' report delivers an in-depth understanding of the disease, historical & forecasted epidemiology of HSV infections in the United States, EU5 (Germany, Spain, Italy, France and United Kingdom), and Japan.

Geography Covered

The United States

EU5 (Germany, France, Italy, Spain and the United Kingdom)

Japan

Study Period: 2016-2028

Neuroblastoma Epidemiology

The Neuroblastoma epidemiology division provide the insights about historical and current patient pool and forecasted trend for every 7 major countries. The epidemiology data for Neuroblastoma are studied through all possible division to give a better understanding about the Disease scenario in 7MM. It also helps to recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

Neuroblastoma Epidemiology Segmentation

The disease epidemiology covered in the report provides historical as well as forecasted

epidemiology [total incident population and incident cases by risk groups (Low risk, intermediate risk and high risk)] of Neuroblastoma in the 7MM covering United States, EU5 countries (Germany, Spain, Italy, France and United Kingdom) and Japan from 2016-2028.

The DelveInsight report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

According to DelveInsight, total incident cases of Neuroblastoma in 7 major markets is found to be about 1530 in 2016.

REPORT SCOPE

The report covers detailed overview of Neuroblastoma explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The report provides the insight about the historical and forecasted patient pool of Neuroblastoma in 7 major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK) & Japan

The Report assesses the disease risk and burden and highlights the unmet needs of the disease

The Report helps to recognize the growth opportunities in the 7MM with respect to the patient population

The report provides the segmentation of the disease epidemiology by risk groups (low, intermediate and high risk group) in 7MM

Key strengths
