Study Period: 2016-2028

Pemphigus Vulgaris (PV) - Disease Understanding and Treatment Algorithm

The DelveInsight PV market report gives the thorough understanding of PV by including

details such as disease definition, classification, symptoms, etiology, pathophysiology, diagnostic trends. It also provides treatment algorithms and treatment guidelines for PV in the US, Europe, and Japan.

Pemphigus Vulgaris (PV) Epidemiology

The Pemphigus Vulgaris epidemiology division provide the insights about historical and current patient pool and forecasted trend for each of the 7 major countries. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the DelveInsight report also provides the diagnosed patient pool and their trends along with assumptions undertaken.

The disease epidemiology covered in the report provides historical as well as forecasted epidemiology [total prevalent cases, prevalent cases by Severity (Mild, Moderate and Severe), diagnosed and treatable cases] of PV in the 7MM covering United States, EU5 countries (Germany, Spain, Italy, France and United Kingdom) and Japan from 2016-2028.

According to DelveInsight, total prevalent population of Pemphigus Vulgaris in 7 major markets was estimated to be 62,747 in 2016.

Pemphigus Vulgaris (PV) Drug Chapters

This segment of the Pemphigus Vulgaris report encloses the detailed analysis of marketed drugs and late stage (Phase-III and Phase-II) pipeline drugs. It also helps to understand the clinical trial details, expressive pharmacological action, agreements and collaborations, approval and patent details, advantages and disadvantages of each included drug and the latest news and press releases.

The current treatment approaches are aimed at controlling the disease rather than serving as a cure. The treatment usually focuses on immune suppression and starts with a corticosteroid; often in combination with steroid-sparing drugs. Although Corticosteroid drugs have been proven to be very effective for this indication by reducing the mortality of several folds since last decade, the related long-term high toxicity hampers the quality of life of the patient. To overcome toxicity, severe side effects and complications of current treatment methods, many companies are developing potential therapies. Detailed chapter for upcoming therapies Rituximab (Hoffmann-La Roche), PRN1008 (Principia Biopharma Inc.), VAY736 (Novartis Pharmaceuticals) and ARGX-113 (Argenx) have been covered in the report.

Pemphigus Vulgaris (PV) Market Outlook

The PV market outlook of the report helps to build the detailed comprehension of the historic, current and forecasted trend of the market by analyzing the impact of current therapies on the market, unmet needs, drivers and barriers and demand of better technology.

This segment gives a through detail of market trend of each marketed drug and late-stage pipeline therapy by evaluating their impact based on annual cost of therapy, inclusion and exclusion criteria's, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated market data are presented with relevant tables and graphs to give a clear view of the market at first sight.

According to DelveInsight, the market of Pemphigus Vulgaris (PV) in 7MM was found to be USD 74.03 million in 2016, and is expected to increase at a CAGR of XX% from 2016-2028.

Pemphigus Vulgaris (PV) Drugs Uptake

This section focusses on the rate of uptake of the potential drugs recently launched in the market or will get launched in the market during the study period from 2016-2028. The analysis covers market uptake by drugs; patient uptake by therapies and sales of each drug.

This helps in understanding the drugs with the most rapid uptake, reasons behind the maximal use of new drugs and allows the comparison of the drugs on the basis of market share and size which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.
