Abstracts

This report can be delivered to the clients within 48 Hours

'Polycythemia - Global API Manufacturers, Marketed and Phase III Drugs Landscape, 2020' report by DelveInsight offers comprehensive insights on marketed and Phase III products for Polycythemia. The marketed products information covers their product details, patents (US & EU), historical and forecasted sales till 2023. It further provides the marketed products API manufacturer details for United States, Europe, China, and India. The report also covers the emerging Phase III pipeline assets for Polycythemia including their detailed product profiles.

Additionally, the report also highlights the future competitive landscape for Polycythemia therapeutics. Depending on information availability comprehensive coverage of the following for Polycythemia marketed products for Polycythemia descriptive marketed product profiles for Polycythemia including (but not limited to) drug description, regulatory milestones, product development and R&D activities encompassing clinical studies, designations, collaborations, licensing deals, grants, technologies and patent details. Also provided are the historical and forecasted global sales till 2023 for each product.

Global API Manufacturers of marketed products for Polycythemia coverage of API manufacturers for Polycythemia marketed products spanning across United States, Europe, China and India. The manufacturers details include manufacturers name along with their location Emerging Phase III products for Polycythemia descriptive Phase III product profiles for Polycythemia including (but not limited to) drug description, product development and R&D activities encompassing clinical and pre-clinical studies, designations, collaborations, licensing deals, grants, technologies and patent details. Also their forecasted global sales are provided till 2023.

Report Methodology

The report provides insights into:

Detailed description of the indication including causes, symptoms, pathophysiology, diagnosis and treatment

Comparative analysis of the marketed and emerging products

Detailed profiles for the marketed therapies available including mechanism of action, dosage and administration regulatory milestones, other development activities

Global sales of the marketed therapies from 2012-2023 is covered in the report

Global API Manufacturers for marketed therapies are provided across United States, Europe, China and India

List of emerging therapies with product name, company, stage of development, indication, route of administration and molecule type is also provided

The report is built using data and information traced from the researcher's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations, and featured press releases from company/university web sites and industry-specific third party sources, etc.

Polycythemia Analytical Perspective by DelveInsight

In-depth Polycythemia Commercial Assessment of Marketed Products

This report provides an in-depth commercial assessment of marketed products, which comprises the details of collaborations, licensing, acquisition - deal value trends, patent and global sales.

Polycythemia Clinical Assessment of Emerging Products

The report comprises of comparative clinical assessment of products by development stage, route of administration and molecule type across this indication.

SCOPE OF THE REPORT

The Polycythemia report provides a comprehensive understanding of Polycythemia marketed and emerging (Phase III) products

Access to API manufacturers details for Polycythemia marketed drugs to devise API procurement strategy for generic development

Plan developmental timelines around marketed drug patents for the major markets- US and EU

Understand current and future growth of marketed Polycythemia therapeutics through their historical and forecasted sales

Identify and analyze future sales trends of emerging Phase III Polycythemia therapeutics through their forecasted sales

Identify the products attributes and use it for target finding, drug repurposing, and precision medicine

Identify and plan ahead for prospective emerging players and their products for Polycythemia

REPORT HIGHLIGHTS

In the coming years, the Polycythemia market is set to change due to the extensive research in this filed, and incremental healthcare spending across the world; which would expand the size of the market to enable the drug manufacturers to penetrate more into the market.

The companies and academics are working to assess challenges and seek opportunities that could influence Polycythemia R&D. The therapies under development are focused on novel approaches to treat/improve the disease condition.

There are many companies involved in developing therapies for Polycythemia. Launch of emerging therapies of Polycythemia will significantly impact the

market.

A better understanding of target mechanism will also contribute to the development of novel therapeutics for Polycythemia.

Our in-depth analysis of the marketed and late-stage pipeline assets comparative analysis of the products. This will support the clients in the decision-making process regarding their therapeutic portfolio by identifying the overall scenario of the research and development activities.

KEY QUESTIONS

What are the current treatment options available based on the Polycythemia?

How many companies are developing therapies for Polycythemia?

What are the principal therapies developed by these companies in the industry?

How many therapies are developed by each company for Polycythemia to treat disease condition?

How many emerging therapies are in late stage of development for Polycythemia?

What is the trend of historical and forecasted sales of the marketed products from the period 2012-2023?

What are the key collaborations (Industry-Industry, Industry-Academia), Mergers and acquisitions, licensing activities related to the Polycythemia therapies?

Which are the API manufacturers across United States, Europe, China and India for the marketed therapies?

How many patents are granted to the marketed therapies of Polycythemia?

How late-stage emerging therapies are distinguished on the basis of their mechanism of action, route of administration and molecule type?

Contents

1. REPORT INTRODUCTION

2. POLYCYTHEMIA

- 2.1. Polycythemia Symptoms
- 2.2. Polycythemia Causes
- 2.3. Polycythemia Types
- 2.4. Polycythemia Risk Factors / Complications
- 2.5. Polycythemia Pathophysiology
- 2.6. Polycythemia Diagnosis
- 2.7. Polycythemia Treatment

3. COMPARATIVE ANALYSIS OF MARKETED AND EMERGING PRODUCTS

- 3.1. Marketed Products
 - 3.1.1. Drug A: Company
 - 3.1.1.1. Product Description
 - 3.1.1.2. Regulatory Milestones
 - 3.1.1.3. Product Development Activities
 - 3.1.1.3.1. General Description Table
 - 3.1.1.4. Global Sales
 - 3.1.1.5. Global API Manufacturers for Drug A
 - 3.1.1.5.1. United States
 - 3.1.1.5.2. Europe
 - 3.1.1.5.3. China
 - 3.1.1.5.4. India
 - 3.1.2. Drug B: Company
 - 3.1.2.1. Product Description
 - 3.1.2.2. Regulatory Milestones
 - 3.1.2.3. Product Development Activities
 - 3.1.2.3.1. General Description Table
 - 3.1.2.4. Global Sales
 - 3.1.2.5. Global API Manufacturers for Drug B
 - 3.1.2.5.1. United States
 - 3.1.2.5.2. Europe
 - 3.1.2.5.3. China
 - 3.1.2.5.4. India

Complete details in the report

3.1.3. Emerging Therapies - Late Phase

3.1.3.1. List of Phase III drugs for Polycythemia

4. APPENDIX

5. REPORT METHODOLOGY

5.1. Secondary Research

5.2. Expert Panel Validation
