Post-Cardiac Arrest Syndrome (PCAS) - Disease Understanding and Treatment Algorithm

The DelveInsight PCAS market report gives the thorough understanding of the PCAS by including details such as disease definition, classification, symptoms, etiology, pathophysiology, diagnostic trends. It also provides treatment algorithms and treatment guidelines for PCAS in the US, EU5, and Japan.

Post-Cardiac Arrest Syndrome Epidemiology

The Post-Cardiac Arrest Syndrome epidemiology division provide the insights about historical and current patient pool and forecasted trend for seven major markets. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the DelveInsight report also provides the diagnosed patient pool and their trends along with assumptions undertaken.

The disease epidemiology covered in the report provides historical as well as forecasted epidemiology (total Diagnosed Incident cases, Resuscitation of Out-Of-Hospital Sudden Cardiac Arrest (OHSCA) Cases, Resuscitation of In-Hospital Sudden Cardiac Arrest (IHSCA) cases), scenario of PCAS in the seven major markets covering United States, EU5 countries (Germany, Spain, Italy, France and United Kingdom) and Japan from 2016-2027.

According to DelveInsight, total diagnosed incident population of Post-Cardiac Arrest Syndrome in the 7 major markets was found to be 1,150,165 in 2016.

Post-Cardiac Arrest Syndrome (PCAS) Drug Chapters

This segment of the PCAS report encloses the detailed analysis of marketed drugs and late stage (Phase-III and Phase-II) pipeline drugs. It also helps to understand the clinical trial details, expressive pharmacological action, agreements and collaborations, approval and patent details, advantages and disadvantages of each included drug and the latest news and press releases.

The current therapeutic market in 7MM is driven majorly by mechanical ventilation and targeted temperature management. Detailed chapter for upcoming therapy like Xenon (NeuroproteXeon/Mallinckrodt) have been covered in the report.

Post-Cardiac Arrest Syndrome Market Outlook

The PCAS market outlook of the report helps to build the detailed comprehension of the

historic, current and forecasted trend of the market by analyzing the impact of current therapies on the market, unmet needs, drivers and barriers and demand of better technology.

This segment gives a through detail of market trend of each marketed drug and late-stage pipeline therapy by evaluating their impact based on annual cost of therapy, inclusion and exclusion criteria's, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated market data are presented with relevant tables and graphs to give a clear view of the market at first sight.

According to DelveInsight, the market of PCAS in the 7MM was found to be USD 547.0 million in 2016, and is expected to increase from 2016-2027.

PCAS Drugs Uptake

This section focusses on the rate of uptake of the potential drugs recently launched in the market or will get launched in the market during the study period from 2016-2027. The analysis covers market uptake by drugs; patient uptake by therapies and sales of each drug.

This helps in understanding the drugs with the most rapid uptake, reasons behind the maximal use of new drugs and allows the comparison of the drugs on the basis of market share and size which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.
