## Abstracts

This report can be delivered to the clients within 5-7 Business Days

DelveInsight's 'Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) - Epidemiology Forecast to 2032' report delivers an in-depth understanding of the disease, historical and forecasted Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology in the 7MM, i.e., the United States, EU5 (Germany, Spain, Italy, France, and the United Kingdom), and Japan.

### Geographies Covered

The United States

EU5 (Germany, France, Italy, Spain, and the United Kingdom)

Japan

Study Period: 2019-2032

Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)  
Understanding

The DelveInsight Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology report gives a thorough understanding of the Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) by including details

such as disease definition, symptoms, causes, pathophysiology, and diagnosis. It also provides treatment algorithms and treatment guidelines for Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) in the US, Europe, and Japan. The report covers the detailed information of the Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology scenario in seven major countries (US, EU5, and Japan).

### Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Epidemiology Perspective by DelveInsight

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology division provides insights about historical and current patient pool and forecasted trend for every seven major countries. The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology data are studied through all possible division to give a better understanding of the Disease scenario in 7MM. The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology segment covers the epidemiology data in the US, EU5 countries (Germany, Spain, Italy, France, and the UK), and Japan from 2019 to 2032. It also helps recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

### Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Detailed Epidemiology Segmentation

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology covered in the report provides historical as well as forecasted Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology scenario in the 7MM covering the United States, EU5 countries (Germany, Spain, Italy, France, and the United Kingdom), and Japan from 2019 to 2032.

The DelveInsight Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

### Scope of the Report

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) report covers a detailed overview explaining its causes, symptoms,

classification, pathophysiology, diagnosis and treatment patterns

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Epidemiology Report and Model provide an overview of the global trends of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient population

The report assesses the disease risk and burden and highlights the unmet needs of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)

The report provides the segmentation of the Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology

## Report Highlights

11-year Forecast of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)

Cases of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) by Mutation Types

Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Cases associated with Clinical Manifestations

## KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

## Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)?

What are the key findings pertaining to the Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) across the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)?

What are the currently available treatments of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD)?

## Reasons to buy

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Epidemiology report will allow the user to -

Develop business strategies by understanding the trends shaping and driving the global Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) market

Quantify patient populations in the global Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) market to improve product design, pricing, and launch plans

Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) therapeutics in each of the markets covered

Understand the magnitude of Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) population by its epidemiology

The Pulmonary Hypertension associated with Interstitial Lung Disease (PH-ILD) Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources
