## Abstracts

This report can be delivered to the clients within 48-72 Hours

DelveInsight's, "Small Fiber Neuropathy - Pipeline Insight, 2021," report provides comprehensive insights about 3+ companies and 3+ pipeline drugs in Small Fiber Neuropathy pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

## Geography Covered

Global coverage

## Small Fiber Neuropathy Understanding

### Small Fiber Neuropathy: Overview

Small fiber neuropathy occurs as a result of damage to the small fibers of the peripheral nervous system are damaged. Small fibers in the skin carries sensory information about pain and temperature. In the organs, these small fibers regulate automatic functions such as heart rate and breathing. Small fiber neuropathy may sometimes be a sign of an underlying health condition, such as diabetes or an autoimmune disease. Most small fiber neuropathies occur in a length-dependent fashion, resulting in loss of function in a stocking distribution in the lower extremities. When the condition is more advanced, a glove-like loss in the upper extremities also may occur. In rare cases, a non-length dependent neuropathy results in symptoms involving the trunk, face, proximal limbs, or other focal areas. Pain in the feet and hands is the most common early symptom of

small fiber neuropathy.

“Small Fiber Neuropathy- Pipeline Insight, 2021” report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Small Fiber Neuropathy pipeline landscape is provided which includes the disease overview and Small Fiber Neuropathy treatment guidelines. The assessment part of the report embraces, in depth Small Fiber Neuropathy commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Small Fiber Neuropathy collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

## **Report Highlights**

The companies and academics are working to assess challenges and seek opportunities that could influence Small Fiber Neuropathy R&D. The therapies under development are focused on novel approaches to treat/improve Small Fiber Neuropathy.

### **Small Fiber Neuropathy Emerging Drugs Chapters**

This segment of the Small Fiber Neuropathy report encloses its detailed analysis of various drugs in different stages of clinical development, including phase II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

### **Small Fiber Neuropathy Emerging Drugs**

#### **VX-150: Vertex Pharmaceuticals**

**Mechanism of Action:** Nav1.8 voltage-gated sodium channel inhibitors. The drug is currently in phase 2 of clinical trials for the treatment of pain caused by small fiber neuropathy.

#### **Vixotrigine (BIIB 074): Biogen**

BIIB 074 is a voltage and use –dependent channel blocker. It is a centrally and

peripherally acting small molecule. Currently, in phase 2 of clinical trials for the treatment of small fiber neuropathy.

Further product details are provided in the report.....

### Small Fiber Neuropathy: Therapeutic Assessment

This segment of the report provides insights about the different Small Fiber Neuropathy drugs segregated based on following parameters that define the scope of the report, such as:

### Major Players in Small Fiber Neuropathy

There are approx. 3+ key companies which are developing the therapies for Small Fiber Neuropathy. The companies which have their Small Fiber Neuropathy drug candidates in the mid to advanced stage, i.e. Phase II include, Biogen and others.

### Phases

DelveInsight's report covers around 3+ products under different phases of clinical development like

- Late-stage products (Phase III)

- Mid-stage products (Phase II and Phase I/II)

- Early-stage products (Phase I/II and Phase I) along with the details of

- Pre-clinical and Discovery stage candidates

- Discontinued & Inactive candidates

### Route of Administration

Small Fiber Neuropathy pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Subcutaneous

Intravenous

Oral

Intramuscular

Parenteral

Molecule Type

Products have been categorized under various Molecule types such as

Small molecules

Peptide

Polymer

Monoclonal antibodies

Gene Therapy

## **Product Type**

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Small Fiber Neuropathy: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase II, I, preclinical and discovery stage. It also analyses Small Fiber Neuropathy therapeutic drugs key players involved in developing key drugs.

## **Pipeline Development Activities**

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Small Fiber Neuropathy drugs.

### Small Fiber Neuropathy Report Insights

Small Fiber Neuropathy Pipeline Analysis

Therapeutic Assessment

Unmet Needs

Impact of Drugs

### Small Fiber Neuropathy Report Assessment

Pipeline Product Profiles

Therapeutic Assessment

Pipeline Assessment

Inactive drugs assessment

Unmet Needs

### Key Questions

Current Treatment Scenario and Emerging Therapies:

How many companies are developing Small Fiber Neuropathy drugs?

How many Small Fiber Neuropathy drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Small Fiber Neuropathy?

What are the key collaborations (Industry–Industry, Industry–Academia), Mergers and acquisitions, licensing activities related to the Small Fiber Neuropathy therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Small Fiber Neuropathy and their status?

What are the key designations that have been granted to the emerging drugs?

### **Key Players**

Vertex Pharmaceuticals

Biogen

### **Key Products**

VX-150

BIIB074
