## Abstracts

This report can be delivered to the clients within 72 hours

DelveInsight's, "Spinal Cord Injury - Pipeline Insight, 2021," report provides comprehensive insights about 35+ companies and 35+ pipeline drugs in Spinal Cord Injury pipeline landscape. It covers the pipeline drug profiles, including clinical and nonclinical stage products. It also covers the therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive pipeline products in this space.

### Geography Covered

Global coverage

### Spinal Cord Injury Understanding

#### Spinal Cord Injury: Overview

Spinal Cord Injury (SCI) is a condition in which damage to any part of the spinal cord or nerves at the end of the spinal canal (cauda equina) occurs. Spinal Cord Injury can be traumatic or non-traumatic. The symptoms of SCI will depend on the type (complete or incomplete) and location of the damage and includes weakness in the arms and/or legs, difficulty breathing, severe pain or pressure in the neck or back, decreased sensation in the arms and/or legs, unusual lumps along the spine, and loss of bladder or bowel control. A diagnosis of SCI is based upon a medical history, physical examination, and testing for sensory function and movement. Tests may include X-rays, Computerized tomography (CT) scan, and Magnetic resonance imaging (MRI). Treatments for SCI includes surgery, medication and physical therapy. The primary aid or measures should

be taken immediately to minimize the injury. Corticosteroid injections may help in spinal cord injuries.

'Spinal Cord Injury - Pipeline Insight, 2021' report by DelveInsight outlays comprehensive insights of present scenario and growth prospects across the indication. A detailed picture of the Spinal Cord Injury pipeline landscape is provided which includes the disease overview and Spinal Cord Injury treatment guidelines. The assessment part of the report embraces, in depth Spinal Cord Injury commercial assessment and clinical assessment of the pipeline products under development. In the report, detailed description of the drug is given which includes mechanism of action of the drug, clinical studies, NDA approvals (if any), and product development activities comprising the technology, Spinal Cord Injury collaborations, licensing, mergers and acquisition, funding, designations and other product related details.

## Report Highlights

The companies and academics are working to assess challenges and seek opportunities that could influence Spinal Cord Injury R&D. The therapies under development are focused on novel approaches to treat/improve Spinal Cord Injury.

## Spinal Cord Injury Emerging Drugs Chapters

This segment of the Spinal Cord Injury report encloses its detailed analysis of various drugs in different stages of clinical development, including phase III, II, I, preclinical and Discovery. It also helps to understand clinical trial details, expressive pharmacological action, agreements and collaborations, and the latest news and press releases.

## Spinal Cord Injury Emerging Drugs

### ES 135: Eusol Biotech

ES135 is a recombinant human acidic fibroblast growth factor (rhFGF1) with 135 amino acids. ES135 promote neurite outgrowth. The sequence of ES135 has been patented in Taiwan, EU, China and the United States. ES135 is undergoing a Phase 3 clinical trial for spinal cord injury treatment.

## MT-3921: Mitsubishi Tanabe Pharma Corporation

MT 3921 is a humanized immunoglobulin G1 (IgG1) anti- RGMa antibody. In July 2021, MT 3921 receives Fast Track designation for Spinal cord injuries [IV] (In the elderly, adults). The therapy is currently under Phase II clinical development for the treatment of Spinal Cord Injury.

Further product details are provided in the report.

### Spinal Cord Injury: Therapeutic Assessment

This segment of the report provides insights about the different Spinal Cord Injury drugs segregated based on following parameters that define the scope of the report, such as:

#### Major Players in Spinal Cord Injury

There are approx. 35+ key companies which are developing the therapies for Spinal Cord Injury. The companies which have their Spinal Cord Injury drug candidates in the most advanced stage, i.e. Phase III include, Eusol Biotech.

#### Phases

DelveInsight's report covers around 35+ products under different phases of clinical development like

Late stage products (Phase III)

Mid-stage products (Phase II)

Early-stage product (Phase I) along with the details of

Pre-clinical and Discovery stage candidates

Discontinued & Inactive candidates

Route of Administration

Spinal Cord Injury pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

Oral

Parenteral

Intravitreal

Subretinal

Topical

Molecule Type

Products have been categorized under various Molecule types such as

Monoclonal Antibody

Peptides

Polymer

Small molecule

Gene therapy

Product Type

Drugs have been categorized under various product types like Mono, Combination and Mono/Combination.

Spinal Cord Injury: Pipeline Development Activities

The report provides insights into different therapeutic candidates in phase III, II, I, preclinical and discovery stage. It also analyses Spinal Cord Injury therapeutic drugs key players involved in developing key drugs.

### Pipeline Development Activities

The report covers the detailed information of collaborations, acquisition and merger, licensing along with a thorough therapeutic assessment of emerging Spinal Cord Injury drugs.

### Spinal Cord Injury Report Insights

- Spinal Cord Injury Pipeline Analysis

- Therapeutic Assessment

- Unmet Needs

- Impact of Drugs

### Spinal Cord Injury Report Assessment

- Pipeline Product Profiles

- Therapeutic Assessment

- Pipeline Assessment

- Inactive drugs assessment

- Unmet Needs

### Key Questions

Current Treatment Scenario and Emerging Therapies:

- How many companies are developing Spinal Cord Injury drugs?

How many Spinal Cord Injury drugs are developed by each company?

How many emerging drugs are in mid-stage, and late-stage of development for the treatment of Spinal Cord Injury?

What are the key collaborations (Industry-Industry, Industry-Academia), Mergers and acquisitions, licensing activities related to the Spinal Cord Injury therapeutics?

What are the recent trends, drug types and novel technologies developed to overcome the limitation of existing therapies?

What are the clinical studies going on for Spinal Cord Injury and their status?

What are the key designations that have been granted to the emerging drugs?

## Key Players

Kringle Pharma

Eusol Biotech

Pharmicell

Pharmazz

AbbVie

Acorda Therapeutics

Geron Corporation

ReNetX Bio

GNT Pharma

AlaMab Therapeutics

Mitsubishi Tanabe Pharma

Kancera

Olatec Therapeutics

Scholar Rock

AXONIS Therapeutics

K-STEMCELL

Nordic Life Science Pipeline

NervGen Pharma

Athersys

Healios

Angiocrine Bioscience

## Key Products

Hepatocyte growth factor

ES 135

Autologous mesenchymal stem cell therapy

Sovateptide

Elezanumab

Fampridine sustained release

OPC 1

AXER-204

Nelonemdaz

ALMB 0166

MT-3921

KAND 567

Dapansutrole

Apitegromab

AAV gene therapy

Stem cell therapies

Spinalon

NVG 291

Invimestrocel

AB-225
