Abstracts

This report can be delivered to the clients within 48 Hours

“TAK935- Emerging Insight and Market Forecast – 2030” the report provides comprehensive insights about an investigational product for Lennox Gastaut Syndrome in 7 Major Markets. A detailed picture of the TAK935 in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan, for the study period 2020–2030 is provided in this report along with a detailed description of the product. The product details cover mechanism of action, dosage and administration, route of synthesis, and Research and development activity including regulatory milestones, and other development activities. Further, it also consists of future market assessments inclusive of the market forecast, SWOT analysis, market competitors, and other emerging therapies.

Overview

TAK-935 or OV935 also known as Soticlestat is an investigational treatment for epileptic encephalopathies. Soticlestat inhibits the activity of an enzyme called cholesterol 24-hydroxylase (CH24H), which is found at high levels in the brain where it plays a role in cholesterol metabolism. It is also involved in regulating a neurotransmitter or cell-signaling molecule called glutamate. Glutamate increases the initiation and spread of seizure activity. High levels of CH24H activate glutamate signaling pathways, inhibition of CH24H by soticlestat should be able to reduce the number and severity of seizures.

Scope of the report

The report provides insights into:

A comprehensive product overview including the product description, mechanism of action, dosage and administration, Research and Development activity.

Elaborated details on regulatory milestones and other development activities have been provided in this report.

The report also highlights the drug research and development activity details across the United States, Europe and Japan.

The report also covers the patents information with expiry timeline around TAK935.

The report contains forecasted sales for TAK935 till 2030.

Comprehensive coverage of the mid-stage emerging therapies (Phase II) for Lennox Gastaut Syndrome.

The report also features the SWOT analysis with analyst insights and key findings of TAK935.

Methodology

The report is built using data and information sourced primarily from internal databases, primary and secondary research and in-house analysis by DelveInsight's team of industry experts. Information and data from the secondary sources have been obtained from various printable and nonprintable sources like search engines, news websites, global regulatory authorities websites, trade journals, white papers, magazines, books, trade associations, industry associations, industry portals and access to available databases.

TAK935 Analytical Perspective by DelveInsight

In-depth TAK935 Market Assessment

This report provides a detailed market assessment of TAK935 in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and

Japan. This segment of the report provides forecasted sales data from 2020 to 2030.

TAK935 Clinical Assessment

The report provides the clinical trials information of TAK935 covering trial interventions, trial conditions, trial status, start and completion dates.

Report highlights

In the coming years, the market scenario for Lennox Gastaut Syndrome is set to change due to the extensive research and incremental healthcare spending across the world; which would expand the size of the market to enable the drug manufacturers to penetrate more into the market.

The companies and academics are working to assess challenges and seek opportunities that could influence TAK935 dominance. The therapies under development are focused on novel approaches to treat/improve the disease condition.

Other emerging products for Lennox Gastaut Syndrome are giving market competition to TAK935 and launch of late-stage emerging therapies in the near future will significantly impact the market.

A detailed description of regulatory milestones, development activities, and some key findings provide the current development scenario of TAK935.

Our in-depth analysis of the forecasted sales data of TAK935 from 2020 to 2030 will support the clients in the decision-making process regarding their therapeutic portfolio by identifying the overall scenario of the TAK935.

Key Questions

Which company is developing TAK935 along with the phase of the clinical study?

What is the technology utilized in the development of TAK935?

What is the product type, route of administration and mechanism of action of TAK935?

What is the clinical trial status of the study and study completion date?

What are the key collaborations, mergers and acquisitions, licensing and other activities related to the TAK935 development?

What are the key designations that have been granted to TAK935?

What is the forecasted market scenario of TAK935?

What is the history of TAK935 and what is its future?

What is the forecasted sales of TAK935 in the seven major countries, including the United States, Europe (Germany, France, Italy, Spain, and the United Kingdom), and Japan?

What are the other emerging products available and how these are giving competition to TAK935?

Which are the late-stage emerging therapies under development for the treatment of the Lennox Gastaut Syndrome?

Contents

1. DRUG OVERVIEW

- 1.1. Product Detail
- 1.2. Mechanism of Action
- 1.3. Dosage and Administration
- 1.4. Research and development activity
 - 1.4.1. Clinical Development
 - 1.4.2. Safety and Efficacy
- 1.5. Other Development Activities

2. MARKET ASSESMENT

- 2.1. 7MM Market Analysis
- 2.2. The United States Market
- 2.3. Germany Market
- 2.4. France Market
- 2.5. Italy Market
- 2.6. Spain Market
- 2.7. United Kingdom Market
- 2.8. Japan Market

3. SWOT ANALYSIS

4. ANALYST VIEWS

5. MARKET COMPETITORS

6. OTHER EMERGING THERAPIES
