## Abstracts

This report can be delivered to the clients within 5-7 Business Days

DelveInsight's 'Transient Ischemic Attack - Epidemiology Forecast to 2032' report delivers an in-depth understanding of the disease, historical and forecasted Transient Ischemic Attack epidemiology in the 7MM, i.e., the United States, EU5 (Germany, Spain, Italy, France, and the United Kingdom), and Japan.

### Geographies Covered

The United States

EU5 (Germany, France, Italy, Spain, and the United Kingdom)

Japan

Study Period: 2019-2032

### Transient Ischemic Attack Understanding

The DelveInsight Transient Ischemic Attack epidemiology report gives a thorough understanding of the Transient Ischemic Attack by including details such as disease definition, symptoms, causes, pathophysiology, and diagnosis. It also provides treatment algorithms and treatment guidelines for Transient Ischemic Attack in the US, Europe, and Japan. The report covers the detailed information of the Transient Ischemic Attack epidemiology scenario in seven major countries (US, EU5, and Japan).

## Transient Ischemic Attack Epidemiology Perspective by DelveInsight

The Transient Ischemic Attack epidemiology division provides insights about historical and current patient pool and forecasted trend for every seven major countries. The Transient Ischemic Attack epidemiology data are studied through all possible division to give a better understanding of the Disease scenario in 7MM. The Transient Ischemic Attack epidemiology segment covers the epidemiology data in the US, EU5 countries (Germany, Spain, Italy, France, and the UK), and Japan from 2019 to 2032. It also helps recognize the causes of current and forecasted trends by exploring numerous studies, survey reports and views of key opinion leaders.

## Transient Ischemic Attack Detailed Epidemiology Segmentation

The Transient Ischemic Attack epidemiology covered in the report provides historical as well as forecasted Transient Ischemic Attack epidemiology scenario in the 7MM covering the United States, EU5 countries (Germany, Spain, Italy, France, and the United Kingdom), and Japan from 2019 to 2032.

The DelveInsight Transient Ischemic Attack report also provides the epidemiology trends observed in the 7MM during the study period, along with the assumptions undertaken. The calculated data are presented with relevant tables and graphs to give a clear view of the epidemiology at first sight.

## Scope of the Report

The Transient Ischemic Attack report covers a detailed overview explaining its causes, symptoms, classification, pathophysiology, diagnosis and treatment patterns

The Transient Ischemic Attack Epidemiology Report and Model provide an overview of the global trends of Transient Ischemic Attack in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan)

The report provides insight into the historical and forecasted patient pool of Transient Ischemic Attack in seven major markets covering the United States, EU5 (Germany, Spain, France, Italy, UK), and Japan

The report helps recognize the growth opportunities in the 7MM for the patient

population

The report assesses the disease risk and burden and highlights the unmet needs of Transient Ischemic Attack

The report provides the segmentation of the Transient Ischemic Attack epidemiology

## Report Highlights

11-year Forecast of Transient Ischemic Attack epidemiology

7MM Coverage

Prevalent and Diagnosed Cases of Transient Ischemic Attack

Cases of Transient Ischemic Attack by Mutation Types

Transient Ischemic Attack Cases associated with Clinical Manifestations

## KOL views

We interview, KOLs and SME's opinion through primary research to fill the data gaps and validate our secondary research. The opinion helps understand the total patient population and current treatment pattern. This will support the clients in potential upcoming novel treatment by identifying the overall scenario of the indications.

## Key Questions Answered

What will be the growth opportunities in the 7MM with respect to the patient population pertaining to Transient Ischemic Attack?

What are the key findings pertaining to the Transient Ischemic Attack epidemiology across 7MM and which country will have the highest number of patients during the forecast period (2019-2032)?

What would be the total number of patients of Transient Ischemic Attack across

the 7MM during the forecast period (2019-2032)?

Among the EU5 countries, which country will have the highest number of patients during the forecast period (2019-2032)?

At what CAGR the patient population is expected to grow in 7MM during the forecast period (2019-2032)?

What is the disease risk, burden and unmet needs of Transient Ischemic Attack?

What are the currently available treatments of Transient Ischemic Attack?

## Reasons to buy

The Transient Ischemic Attack Epidemiology report will allow the user to -

- Develop business strategies by understanding the trends shaping and driving the global Transient Ischemic Attack market

- Quantify patient populations in the global Transient Ischemic Attack market to improve product design, pricing, and launch plans

- Organize sales and marketing efforts by identifying the age groups and sex that present the best opportunities for Transient Ischemic Attack therapeutics in each of the markets covered

- Understand the magnitude of Transient Ischemic Attack population by its epidemiology

The Transient Ischemic Attack Epidemiology Model developed by DelveInsight is easy to navigate, interactive with dashboards, and epidemiology based with transparent and consistent methodologies. Moreover, the model supports data presented in the report and showcases disease trends over 11-year forecast period using reputable sources
