OVERVIEW

“Tukysa - Drug Insight and Market Forecast - 2030” report by DelveInsight outlays comprehensive insights of the product indicated for the treatment of its approved condition. A detailed picture of the Tukysa in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan, for the study period 2017 - 2030 is provided in this report along with a detailed description of the product. The product details covers mechanism of action, dosage and administration, route of synthesis, and pharmacological studies, including product marketed details, regulatory milestones, and other development activities. Further, it also consists of market assessments inclusive of the market forecast, SWOT analysis, and detailed analyst views. It further highlights the market competitors, late-stage emerging therapies, and patent details in the global space.

Drug Summary

Tucatinib, sold under the brand name Tukysa, is a kinase inhibitor meaning it blocks a type of enzyme (kinase) and helps prevent the cancer cells from growing. Tukysa is approved for treatment after patients have taken one or more anti-HER2-based regimens in the metastatic setting.

In April 2020, the U.S. Food and Drug Administration approved Tukysa (tucatinib) in combination with chemotherapy (trastuzumab and capecitabine) for the treatment of adult patients with advanced forms of HER2-positive breast cancer that can't be removed with surgery, or has spread to other parts of the body, including the brain, and who have received one or more prior treatments. The FDA granted approval of Tukysa

to Seattle Genetics.

SCOPE OF THE REPORT

The report provides insights into:

A comprehensive product overview including the product description, mechanism of action, dosage and administration, route of synthesis, pharmacological studies (pharmacodynamics and pharmacokinetics) and adverse reactions.

Elaborated details on regulatory milestones and other development activities have been provided in this report.

The report also highlights the drug marketed details across the United States, Europe and Japan.

The report also covers the patents information with expiry timeline around Tukysa.

The report contains historical and forecasted sales for Tukysa till 2030.

Comprehensive coverage of the late-stage emerging therapies (Phase III) in the space with a brief snapshot of the details.

The report also features the SWOT analysis with analyst insights and key findings of Tukysa.

METHODOLOGY

The report is built using data and information sourced primarily from internal databases, primary and secondary research and in-house analysis by DelveInsight's team of industry experts. Information and data from the secondary sources have been obtained from various printable and nonprintable sources like search engines, news websites, global regulatory authorities websites, trade journals, white papers, magazines, books, trade associations, industry associations, industry portals and access to available databases.

Tukysa Analytical Perspective by DelveInsight

In-depth Tukysa Market Assessment

This report provides a detailed market assessment of Tukysa in Seven Major Markets, i.e., United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan. This segment of the report provides historical and forecasted sales data from 2017 to 2030.

Tukysa Clinical Assessment

The report provides the clinical trials information of Tukysa covering trial interventions, trial conditions, trial status, start and completion dates.

Report highlights

In the coming years, the market scenario for Tukysa is set to change due to the extensive research in the treatment of the indicated condition and incremental healthcare spending across the world; which would expand the size of the market to enable the drug manufacturers to penetrate more into the market.

The companies and academics are working to assess challenges and seek opportunities that could influence Tukysa dominance. The therapies under development are focused on novel approaches to treat/improve the disease condition.

Other approved products for the disease are giving market competition to Tukysa and launch of late-stage emerging therapies in the near future will significantly impact the market.

A detailed description of regulatory milestones, development activities, and some key findings provide the current market scenario of Tukysa.

Our in-depth analysis of the sales data of Tukysa from 2017 to 2030 will support the clients in the decision-making process regarding their therapeutic portfolio by identifying the overall scenario of the Tukysa in the market.

Key Questions

What is the prescribed dosage and strengths of Tukysa are available in the market?

What are the common adverse reactions or side effects of Tukysa?

What is the product type, route of administration and mechanism of action of Tukysa?

What are the chemical specifications of Tukysa?

How are the clinical trials diversified on the basis of the trial status?

What is the history of Tukysa, and what is its future?

What are the marketed details of Tukysa in the seven major countries, including the United States, Europe (Germany, France, Italy, Spain, and the United Kingdom), and Japan?

How many patents have been granted to Tukysa and when these patents will get expire?

What are the pros (benefits) and cons (disadvantages) of Tukysa?

In which countries Tukysa got approval and when it gets launched?

What are the clinical trials are currently ongoing for Tukysa?

How the safety and efficacy results determined the approval of Tukysa?

What are the key collaborations, mergers and acquisitions, licensing and other activities related to the Tukysa development?

What are the key designations that have been granted to Tukysa?

What is the historical and forecasted market scenario of Tukysa?

How is the market trend of Tukysa is different in the Seven Major Markets (the

United States, EU5 [Germany, France, Italy, Spain, and the United Kingdom], and Japan)?

What are the other approved products available and how these are giving competition to Tukysa?

Which are the late-stage emerging therapies under development for the treatment of the indicated condition?
