Overview of pipeline development activities for Wet AMD

Pipeline analysis of therapeutic drugs include but are not limited to drug description and development activities focusing on clinical and pre-clinical results, designations, collaborations & licensing deals, grants, technology and patent details.

Therapeutic segmentation of products for Wet AMD

The report comprises of comparative pipeline therapeutics assessment by development stage, therapy type, molecule type, and administration route across this indication.

METHODOLOGY

Data used in the report are sourced primarily from internal databases, primary and secondary research and in-house analysis by DelveInsight's team of industry experts.

Information and data from the secondary sources have been obtained from various printable and non-printable sources like search engines, news websites, global regulatory authorities websites, trade journals, white papers, magazines, books, trade associations, industry associations, industry portals and access to available databases.

SCOPE OF THE REPORT

Provides an overview of therapeutic pipeline activity for Wet AMD across the complete product development cycle including all clinical and non-clinical stages

It comprises of detailed profiles of Wet AMD therapeutic products with key coverage of developmental activities including licensing & collaboration deals, patents issued, designations, technologies and chemical information

Therapeutic assessment of the active pipeline products by stage, product type, molecule type, and route of administration

Coverage of dormant and discontinued pipeline projects across Wet AMD

REASONS TO BUY

Establish a comprehensive understanding of the current pipeline scenario across Wet AMD to formulate effective R&D strategies

Assess challenges and opportunities that influence Wet AMD R&D

Gather impartial perspective of strategies of the emerging competitors having potentially lucrative portfolio in this space and create effective counter strategies to gain competitive advantage

Identify the relationship between the products and use it for target finding, drug repurposing, and precision medicine
