### Research Summary

Agricultural film is a type of plastic film used in various agricultural practices to improve crop growth, protect plants, and enhance farming efficiency. Made primarily from polyethylene or other plastic materials, agricultural films come in different forms and serve specific functions. For instance, mulch film is used to suppress weeds, conserve soil moisture, and regulate soil temperature, while greenhouse film creates a controlled environment for plant growth. Silage film is used for storing livestock feed, and anti-UV film protects crops from excessive sunlight. These films play a crucial role in modern agriculture by improving crop yields, reducing water usage, and providing protection against pests and adverse weather conditions. However, their use also poses challenges related to plastic waste and environmental pollution, leading to efforts to develop more sustainable alternatives.

The major global manufacturers of Agricultural film include Xuri Plastic, Plastika Kritis, Kelun Plastics, Xifeng Plastics, Lu Guan, Fuyu Plastic, Qingtian Plastic, Huadun, Yin Feng, Dongda Plastic, Mingri, Xinsan Plastic, Zhi Xin, etc. The global players
