### Research Summary

Airbag textile refers to the specialized fabric used in the manufacturing of airbags. This fabric is designed to be very strong and durable while also being lightweight and flexible. Airbag textiles are typically made from nylon or polyester fibers which are coated with a thin layer of silicone or other synthetic materials to make them waterproof and fire-retardant. They also have special weaving techniques that allow them to have a strong and tight mesh structure that can withstand high pressure and sudden impacts. The purpose of airbag textile is to quickly inflate and protect the occupants of a vehicle during a crash or collision.

The major global manufacturers of Airbag Textile include Hyosung, Toyobo, Toray, Kolon, HMT, UTT, Porcher Industries, Safety Components, Milliken Textiles, etc. The global players competition landscape in this report is divided into three tiers.
