### Research Summary

Allulose, also known as D-psicose, is a low-calorie sugar substitute that is nearly identical in taste and texture to regular table sugar. It is a naturally occurring sugar found in certain plants, but can also be produced through a refined manufacturing process using enzymes. Unlike regular sugar, allulose has virtually no calories and does not significantly raise blood sugar levels, making it a popular alternative for people who are looking to reduce their sugar and calorie intake. Allulose has been approved as a food ingredient in the United States and Japan.
