Research Summary

Amebocyte lysate is a protein extract derived from horseshoe crab blood cells (amebocytes). It is used in the medical and pharmaceutical industries to detect and measure endotoxins, which are found in the cell walls of gram-negative bacteria. Amebocyte lysate is highly sensitive to even very low levels of endotoxins, making it a useful tool in product quality control and safety testing to ensure that medical and pharmaceutical products are free of bacterial contamination. The use of amebocyte lysate is preferred over traditional culture-based methods for endotoxin detection due to its rapid and accurate nature.

The major global manufacturers of Amebocyte Lysate include LONZA, Charles River Laboratories, Associates of Cape Cod, Fujifilm, Xiamen Bioendo Technology, Zhanjiang A&C Biological, Zhanjiang Bokang, Fuzhou Xinbei, etc. The global players competition landscape in this report is divided into three tiers.
